Report of The Directors

7. Profile of Directors seeking re-election

The profile of Directors seeking re-election or confirmation at the Annual General Meeting.

Mr. Ioannis Katsaounis

Mr. Thanassis Mazarakis

Alhaji Olalekan Saliu

Mr. Folarin Williams

Mr. Omoboyede Oyeboanle Olusanya

Mr. Ioannis Katsaounis

Mr. Ioannis Katsaounis is a non-executive member of the Board of Directors of Flour Mills of Nigeria Plc, a position he has occupied since September, 1993.

Mr. Katsaounis holds a Graduate Degree in Economics University of Geneva (1972); Graduate Degree in Regional Development, University of Athens (1975); Bachelor of Science Degree in Mechanical Engineering (University of Minnesota 1969) and an MBA in Economics from the University of California, Berkeley (1970). He is an alumnus of Harvard Business School of Post Graduate Studies.

Prior to joining Flour Mills, Mr. Katsaounis was the founder and owner of Plexus Construction Company, Greece (1974 – 1985). He has also served as Managing Director and General Manager of Alucanco S.A. Greece, an aluminum cans manufacturing company (1985-2000).

Mr. Thanassis Mazarakis

Thanassis Mazarakis is a non-executive member of the Board of Directors of Flour Mills of Nigeria PLC, a position he has occupied since 3rd July, 2006.

He holds a Bachelor of Arts degree from Princeton University (1984) and a Masters in Business Administration from the Wharton School at the University of Pennsylvania (1985). Prior to joining Flour Mills, Mr. Mazarakis has held numerous finance, marketing and general management positions. Most recently he was the Chief Financial Officer of the Prudential Insurance Company of America, one of the largest US life insurance companies, and the Chief Executive Officer of Chase Merchant Services, the largest global credit and debit card transaction processor.

Mr. Folarin Rotimi Abiola Williams

Mr. F. R. A. Williams Jnr, a Chemical Engineer and a legal practitioner, joined the Board of Flour Mills of Nigeria Plc as a non-executive member on 20th May, 2005.

He was educated at Imperial College of Science and Technology, London where he graduated BSc. (Hons.) AGGI Chemical Engineering. He received an award for Outstanding Work in the Humanities at the University of London in 1976

Following a study at Selwyn College Cambridge from 1981 to 1983, Mr. Williams obtained MA Cantab Law and subsequently attended the Nigerian Law School from 1983 to 1984.

Mr. Williams is a highly experienced legal practitioner who is principally active in commercial and corporate advisory work and litigation

He is currently serving on the Board of Pharma-Deko Plc, G. Cappa Plc, Smithkline Beecham Plc and a number of other companies.

Alhaji Yunus Olalekan A. Saliu

Alhaji Saliu is a Fellow of the Institute of Chartered Accountants of Nigeria (ICAN) and a Fellow of Association of Certified Chartered Accountants, U.K.

Alhaji Saliu who holds an Upper Second Class honours Bachelor of Science Degree in Economics, University of Ibadan (June 1969) had a brief stint with the Civil Service of the old Western Nigeria before travelling to the United Kingdom in January 1971 for training in Accountancy which he completed in June 1973.

Flour Mills of Nigeria Plc

Annual Report for the year ended 31 March 2020

Report of The Directors

On return to Nigeria in 1974, he joined the accounting firm of KPMG Audit (formerly Peat Marwick Ani Ogunde & Co) and rose to the position of a Partner before joining Flour Mills of Nigeria Plc in February 1994 as Finance Director/Company Secretary. He stepped aside from his role of Finance Director in September, 2011 and continued to serve Flour Mills as an Executive Director and Company Secretary.

Alhaji retired as the Company Secretary on 31st December 2015 and remained on the Board of Directors as a Non-Executive Director of the Company.

Mr. Omoboyede Oyeboalanle Olusanya

Mr. Omoboyede Oyeboalanle Olusanya was appointed to the Board of Flour Mills of Nigeria Plc. as an Executive Director on Wednesday 29th July 2020.

Mr Omoboyede Olusanya is a highly experienced leader with prowess in creating long-term strategic and financial value across several industries, including Telecommunications, Financial, Energy and Manufacturing. Before joining FMN, Mr Olusanya had served in similar leadership positions including, Chief Business Transformation Officer at Dangote Group, where he spearheaded the transformation of the group. Between July 2017 and October 2018, he was the Managing Director / CEO of Emerging Market Telecommunications Service (9Mobile). He also serves on the Board of Directors of Axxela, Starsight and OVH Energy.

Mr Olusanya holds a B.Sc (Hons) in Civil Engineering from the University of Lagos, and two Masters degrees in Environmental Engineering and Computer Science from the University of Liverpool and the University of Manchester respectively.

8. Directors' Responsibilities

The Directors are responsible for the preparation of financial statements which give a true and fair view in accordance with International Financial Reporting Standards (IFRSs) and in the manner required by the Companies and Allied Matters Act, Cap C.20 Laws of the Federation of Nigeria, 2004. In doing so, they ensure that:

- proper accounting records are maintained;
- applicable accounting standards are complied with;
- suitable accounting policies are adopted and consistently applied;
- judgments and estimates made are reasonable and prudent;
- the going concern basis is used, unless it is inappropriate to presume that the Company will continue in business and;
- Internal control procedures are instituted which, as far as is reasonably possible, safeguard the assets and also prevent and detect fraud and other irregularities.

9. Directors' interests in shares

The Directors' interests in the issued share capital of the Company as recorded in the Register of members and/or as notified by them for the purpose of Section 275 of the Companies and Allied Matters Act, Cap C20 Laws of the Federation of Nigeria, 2004 are as follows:

Flour Mills of Nigeria Plc

Annual Report for the year ended 31 March 2020

Report of The Directors

17. Human Capital

(a) Employment and Employees

The Company reviews its employment policy in line with the needs of our business. Careful recruiting is undertaken to ensure that potential high performers are attracted and retained.

(b) Employee Developments

Local and overseas training and development programmes are organized to meet the needs of the Company's modernization / automation strategy implementation.

The Company continues to place premium on its human capital development arising from the fact that this would ensure improved efficiency of the business and maintain strategic advantage over competition.

(c) Equal Employment Opportunity and Diversity

Subject to applicable laws, we recruit, hire, train, promote, discipline and provide other conditions of employment without regard to a person's race, colour, religion, sex, age, national origin, disability or other classifications protected under law. This includes providing reasonable accommodation for members' disabilities or religious beliefs and practices.

(d) Health, Safety and Environment

The Company appreciates the value of a safe work environment to business success and therefore embarks on periodic assessments to ensure compliance and safety. Employees are continuously sensitized and pep talks on safe work procedures precede the commencement of each shift in the operational areas. The Company provides Personal Protective Equipment to employees as required by the nature of their jobs and safety officers perform regular monitoring to ensure usage compliance.

With the advent of the novel coronavirus (2019-nCov) confirmed by World Health Organization in January 2020, periodic health advisory published on banners, posters, handbills, pocket booklets and through the internal communication platform were circulated on the nature of the virus, mode of transmission and basic precautionary measures. Safety measures were mobilized including the provision of hand sanitizers, nose masks, activation of wash points, strict monitoring on social distancing practices across business sites leveraging on the Ebola virus prevention protocol.

There is a fully equipped clinic at the docksite to cater for employees located at the Port. This is in addition to the well-equipped Clinics at Apapa and Iganmu. Needful employees requiring referrals on health issues are handled by the retainer hospital

There are fully equipped clinics at its various sites of operations

The employee canteens at Iganmu, Apapa and other major sites continue to provide nutritionally balanced healthy meals in very conducive environment and at subsidized rates.

(e) HIV/AIDS Policy

HIV/AIDS policy guidelines are in place and employees are encouraged to undertake voluntary counseling and testing (VCT) in order to confirm their HIV status. Continuous interactions at workshops with known HIV positive individuals are arranged from time to time to educate staff and eliminate discrimination and stigmatization. Regular educational programmes are arranged to sustain the message as part of the activities to mark World's AIDS day annually.

(f) Performance Management/Target Setting

Performance management/target setting is implemented in line with Management resolve to set strategic objectives for effective monitoring of performance of the Company and its employees.

18. Sustainability Statement

FMN's Sustainability approach is based on respect for our people, cultures and the natural environment.

We are committed to preserving biodiversity, reducing water usage, waste and the emission of Greenhouse gases. We care for the livelihood of the local communities and our employees in terms of health and welfare. We continually strive to improve the environmental, social and economic aspects of our operations.

Flour Mills of Nigeria Plc

Annual Report for the year ended 31 March 2020

Report of The Directors

Our vision becomes reality by putting into action programs and practices that optimize the use of natural resources, by developing energy efficient products and technologies, and by fostering innovations and creative solutions adding value for clients, communities and the environment.

We have the capacity to grow sustainably.

19. Auditors

Messrs. KPMG Professional Services, having satisfied the relevant corporate governance rules on their tenure in office have indicated their willingness to continue in office as auditors to the Company. In accordance with Section 357(2) of the Companies and Allied Matters Act Cap C20 Laws of the Federation of Nigeria, 2004 therefore, the auditors will be re-appointed at the next annual general meeting of the Company without any resolution being passed.

A resolution will however be proposed authorizing the Directors to determine the remuneration of the Auditors.

BY ORDER OF THE BOARD

UMOLU, JOSEPH A.O.
Company Secretary
FRC/2013/NBA/00000003687
1 Golden Penny Place,
Wharf Road, Apapa.
Lagos, Nigeria.
29 July, 2020

Flour Mills of Nigeria Plc

Annual Report for the year ended 31 March 2020

Corporate Governance Report for the year ended 31 March 2020

1. Introduction

Flour Mills of Nigeria Plc is committed to the best practice and procedures in corporate governance. Its business is conducted in a fair, honest and transparent manner which conforms to high ethical standards. This enables the Board of Directors and Management to accomplish the company's strategic goals, ensure good growth and corporate stability for the benefit of all stakeholders.

2 Board Composition

The Company's Articles of Association provide that the Company's Board of Directors shall consist of not more than fifteen directors. Presently, the Board has a non-executive Chairman, a non-executive Vice Chairman, one executive director and eleven non-executive directors, two of whom are independent directors. The thorough process for selecting Board members gives premium to educational and professional background, integrity, competence, capability, knowledge, expertise, skills, experience and diversity.

3. Board Meetings

Members of the Board of Directors hold a minimum of four quarterly meetings to approve the company's business strategy and objectives, decide on policy matters, direct and oversee the Company's affairs, progress, performance, operations, and finances; and ensure that adequate resources are available to meet the Company's goals and objectives. Attendance of Directors at quarterly meetings is very good.

It is noteworthy that the company's Memorandum and Articles of Association allows for teleconferencing in order to ensure wide consultation and maximum participation by board members.

In line with provisions of Section 258(2) of the Companies and Allied Matters Act Cap. C.20 Laws of the Federation of Nigeria, 2004, record of Directors' attendance at Board meetings is available for inspection at the Annual General Meeting.

4 Role of Directors

The highlights of the role of directors include:

- Critical and regular examination of the company's overall strategy with a view to ensuring that its goals, business plan and budget are in alignment.
- Assign respective committees to consider and take appropriate decisions on issues requiring Board attention.
- Establish well-considered objectives for the company and monitor implementation, reviewing performance and ensure the deployment of appropriate competencies.
- Ensure that adequate resources are available to meet the company's goals and objectives.
- Oversee Board appraisal, training, succession planning, appointment and remuneration of members.

5. Frequency and Attendance of Board Meetings

The Board held four (4) meetings during the financial year ended 31 March 2020. The notice for each meeting was in line with the Company's Articles of Association and Board papers were provided to directors in advance.

Senior Executives of the company are from time to time invited to attend Board meetings and make representations of their business units.

A summary of the record of attendance at Board meetings is presented below:

The Board of Directors has an approved annual training plan designed in line with the identified training needs and suggestions of its members.

The Remuneration and Governance Committee of the Board assess and evaluate prospective candidates and make appropriate recommendation to the Board with respect to appointments to the Board. A description of the desirable characteristics that the Remuneration and Governance Committee and the Board should consider before recommending candidates for nomination/appointment as Directors are set out in the Board of Directors Charter and include:

- Integrity, reputation, knowledge, competence and commitment.
- Familiarity with Nigerian commercial and economic environment.
- Regional balancing.
- Good network in FMN areas of business.

The Remuneration and Governance Committee reviews such qualities and characteristics at least annually and recommend any appropriate changes to the Board for consideration.

11 Board Evaluation Process and Summary of Evaluation Results

The Board established a system to undertake a formal and effective annual evaluation of its performance and that of its Committees, the Chairman and the individual directors.

The Board designed questionnaires for evaluation on areas such as the review of FMN's Corporate Governance framework, with specific focus on the Board structure and composition, responsibilities, proceedings and relationships, individual director's competencies and respective roles in the performance of the Board.

The questionnaire for evaluation for the year ended 31st March 2020 was completed by members online and the summary of the results compiled electronically.

On the basis of the evaluation exercise, the Board of FMN demonstrated good understanding of the responsibilities as provided in the SEC Code of Corporate Governance and largely complied during the year ended 31 March 2020.

12 The Corporate Governance Rating System Certification

Flour Mills of Nigeria Plc is one of the Corporate Governance Rating System (CGRS) certified listed companies in Nigeria after being duly certified and accorded the CGRS certification mark with effect from January 2018 with a three-year validity period.

13 Report on Compliance with the Nigerian Code of Corporate Governance 2018

14 Management Committee

The day to day management of the business is the responsibility of the Group Managing Direct/ Chief Executive Officer who is assisted by a Management Committee made up of Heads of Departments in the Company.

The core of the Management Committee, the "Change Leadership Team" holds regular meetings to deliberate on critical issues affecting the day to day running of the organization and strategic positioning of the business.

The composition of the Management Committee is as set out in page 11 of this Annual Report.

Flour Mills of Nigeria Plc

Annual Report for the year ended 31 March 2020

Corporate Governance Report

15 Sustainability Policies and Environmental initiatives

FMN is aware that sustainability is a journey, as such, our long-term strategy is inspired by the need for continuous capacity expansion, an enhanced route to market capability, the innovation of products of superior quality and realignment of our core food business. To ensure our process remains sustainable in the long run, the Company continues to backwardly integrate to mitigate further reliance on imports and exposure to external volatility in the food business. The need to create value in the supply chain and reduce dependence on imported raw material is a strategic imperative that the Company committed to achieving.

As an environmentally responsible organization, FMN has adopted more energy-efficient technologies across our factories and plants by fostering innovations and implementing creative solutions. In our mills, the Company has introduced newer and more innovative technologies to reduce our carbon footprint. The business has also adopted more climate-friendly designs that feature low noise pollution and dust extraction monitoring systems, whilst adopting a production process with minimal impact on our environment. As expected, our process and impact assessment at FMN is designed to be retrospective as it is prospective. FMN will continue to put first our responsibility to our Planet, its People and our Returns.

16 Human Resources Policies and other matters

The Company recognizes that its human resources are very valuable assets. Consequently, the human resources policies of the Company are to ensure that the Company continues to place premium on its human capital development arising from the fact that this would ensure improved efficiency of the business and maintain strategic advantage over competition.

The Management holds periodic meetings with the employees in order to brief them on business related issues and exchange ideas that are beneficial. In addition, Management communicates corporate issues to employees regularly through circulars and newsletters – “Golden Penny News”.

17 Risk Management, Internal Audit and Control and Compliance

The Board is responsible for maintaining a sound system of internal control to safeguard shareholder’s investments and the Company’s assets in line with extant laws, regulations and FMN’s policies.

The Company’s efforts to continuously ensure sound financial discipline and adherence to high ethical standards, as part of its robust corporate governance strategy, have resulted in the setting up of a strong Group Internal Audit which is risk focused.

Internal audit function is currently manned by a team of professionals charged with the responsibility of ensuring that strategic business risks facing the Group are promptly identified, effectively mitigated, recommendations proffered and continuously monitored. To ensure independence of this important function, Internal Audit reports directly to the statutory Audit Committee on a quarterly basis and is supervised by the Risk Management Committee of the Board.

The Company’s Risk Management Policy is available on the company’s website and can be assessed through www.fmnplc.com

18 Code of Business Conduct

In demonstration of strong commitment to best practices in corporate governance, integrity and high ethical standards in all aspects of our business, FMN has a Code of Conduct in place. Apart from being in line with current global trends, FMN’s Code of Conduct aligns with the requirements of regulatory authorities.

Through the provisions of the Code, FMN instills in its Directors and Employees the need to maintain high standard of corporate values, transparency, accountability, professionalism and promote good corporate governance.

19 Whistle Blowing

Under the Company’s whistle blowing policy and procedures, employees and other stakeholders including third parties are encouraged to report any observed or suspected acts of fraud, corruption or other irregularities, orally or anonymously contact the independent helpline by telephone or online without fear of reprisal or recrimination.

The company guarantees that the identity of the reporting individual or organization shall be accorded utmost protection and the report timeously investigated and treated.

The robust system has been embraced by all employees and stakeholders and it is producing good results.

Annual Report for the year ended 31 March 2020

Corporate Governance Report

20 Security Trading Policy

Flour Mills of Nigeria Plc has in place a Code of Conduct which aligns with section 14 of the Amendment to the Listing Rules of the Nigeria Stock Exchange.

During the financial year under review, the Directors and employees of the company complied with the Nigerian Stock Exchange Rules relating to securities transactions and the provisions of the FMN Code on Insider Trading.

21 Complaints Management Policy

In line with the Securities and Exchange Commission (SEC) Rules relating to the Complaints Management Framework of the Nigerian Capital Market, FMN has established and maintained a clearly defined Complaints Management Policy to handle and resolve complaints within the purview of the Framework.

The framework as established by FMN involves the maintenance of an electronic complaints register by the Registrars and the Policy is available on the company's website and can be assessed through www.fmnplc.com

The electronic complaints register is updated on a daily basis by the Registrars with complaints received from shareholders. Steps taken towards the resolution of the matter(s) and the duration of communicating to the Shareholders are also maintained on the Register. Returns on Complaints management are sent by the Registrars on quarterly basis to the Securities and Exchange Commission.

Directors' Responsibilities in Relation to the Financial Statements

The Directors accept responsibility for the preparation of the annual consolidated and separate financial statements that give a true and fair view in accordance with International Financial Reporting Standards and in the manner required by the Companies and Allied Matters Act Cap C.20 Laws of the Federation of Nigeria, 2004 and the Financial Reporting Council of Nigeria Act, 2011.

The Directors further accept responsibility for maintaining adequate accounting records as required by the Companies and Allied Matters Act Cap C.20 Laws of the Federation of Nigeria, 2004 and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement whether due to fraud or error.

The Directors have made an assessment of the Group and Company's ability to continue as a going concern and have no reason to believe the Group and Company will not remain a going concern in the year ahead.

AUDIT COMMITTEE REPORT

TO MEMBERS OF FLOUR MILLS OF NIGERIA PLC FOR THE FINANCIAL YEAR ENDED 31ST MARCH, 2020

In compliance with section 359 (3) to (6) of the Companies and Allied Matters Act, Cap C 20 , Laws of the Federation of Nigeria, 2004, the Audit Committee received the Audited Financial Statements for the year ended 31st March 2020 together with the Management letter from the External Auditors and management response thereto at the duly convened meeting of the Committee.

We reviewed the scope and planning of the audit requirements and found them adequate.

After due consideration the Committee accepted the Report of the External Auditors that the financial statements give a true and fair view of the state of the Company's financial affairs as at 31st March 2020 having been prepared in accordance with International Financial Reporting Standards (IFRS). The Committee reviewed Management's response to the External Auditors findings in the Management letter and we are satisfied with Management responses.

The Committee considered and approved the provision made in the Financial Statements for the remuneration of the External Auditors.

We confirm that the internal control system was constantly and effectively monitored through effective internal audit function.

The External Auditors confirmed that they received full cooperation from Management in the course of their statutory audit.

The Committee therefore recommended that the Audited Financial Statements for the year ended 31st March 2020 and the External Auditors' Report thereon be presented for adoption at this Annual General Meeting.

Dated 16th July, 2020

INDEPENDENT AUDITOR'S REPORT

To the Shareholders of Flour Mills of Nigeria Plc

Report on the Audit of the Consolidated and Separate Financial Statements**Opinion**

We have audited the consolidated and separate financial statements of Flour Mills of Nigeria Plc ("the Company") and its subsidiaries (together, "the Group"), which comprise the consolidated and separate statements of financial position as at 31 March 2020, and the consolidated and separate statements of profit or loss and other comprehensive income, consolidated and separate statements of changes in equity and consolidated and separate statements of cash flows for the year then ended, and notes, comprising significant accounting policies and other explanatory information, as set out on pages 31 to 144.

In our opinion, the accompanying consolidated and separate financial statements give a true and fair view of the consolidated and separate financial position of the Company and its subsidiaries as at 31 March 2020, and of its consolidated and separate financial performance and its consolidated and separate cash flows for the year then ended in accordance with International Financial Reporting Standards (IFRSs) and in the manner required by the Companies and Allied Matters Act, Cap C.20, Laws of the Federation of Nigeria, 2004 and the Financial Reporting Council of Nigeria Act, 2011.

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the consolidated and separate Financial Statements* section of our report. We are independent of the Group and Company in accordance with International Ethics Standards Board for Accountants *International Code of Ethics for Professional Accountants (including International Independence Standards)* (IESBA Code) together with the ethical requirements that are relevant to our audit of the consolidated and separate financial statements in Nigeria and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated and separate financial statements of the current period. These matters were addressed in the context of our audit of the consolidated and separate financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

1. Revenue recognition	
Refer to significant accounting policies (Note 2.3) and Revenue (Note 6) in the consolidated and separate financial statements	
Key Audit Matter	How the matter was addressed in our audit
<p>The Group is diversified and earns revenue from a wide range of activities with varying revenue recognition criteria. This requires a careful assessment of the appropriateness and timing of revenue recognition in accordance with the requirements of IFRS 15 <i>Revenue from contracts with customers</i>.</p> <p>Furthermore, revenue is the most significant income statement account and impacts the majority of the key performance indicators on which the Company and the Group are assessed.</p> <p>These factors make revenue an area of significance in our audit.</p>	<p>The following audit procedures were performed among others:</p> <ul style="list-style-type: none"> • We evaluated the design, implementation and operating effectiveness of key controls over customer invoicing, three-way match, price approvals and customer credit limits. • We engaged our Information Technology (IT) specialist to apply computer assisted audit techniques to recompute revenue based on the sales quantities and approved selling prices and to identify manual entries recorded in the revenue general ledger. • We inspected contractual agreements on a sample basis to determine the appropriateness and timing of revenue recognition in accordance with the requirements of the relevant accounting standards. • We checked the completeness, existence and accuracy of inter-division and intra-group transactions and checked that such transactions were reconciled and eliminated in preparing the financial statements of the Company and the Group. • We selected a sample of manual journals recorded in the respective revenue ledgers and inspected the underlying documentation for existence of the appropriate approvals, as well as justification for recording the journal entries. • We selected a sample of discounts and rebates granted to customers and inspected relevant underlying documentation to assess if they were accurately computed and accounted for in the appropriate financial period. • We performed cut-off procedures by checking that revenue transactions occurring both prior to and post the year end date were recognized in the appropriate period.

2. Recoverability of intercompany and third-party loans and trade receivables	
Refer to significant accounting policies (Note 2.8.1) and Long-term loan receivables and Trade and other receivables (Notes 25 & 27) in the consolidated and separate financial statements.	
Key Audit Matter	How the matter was addressed in our audit
<p>A number of companies within the Group are financed through intercompany loans and receivables.</p> <p>The Directors are required to make significant judgements and assumptions in the application of the appropriate Expected Credit Loss (ECL) model to use in arriving at the impairment allowance. In calculating the expected credit loss the Directors have also incorporated the estimated impact of the COVID 19 pandemic on receivable collections.</p> <p>Recoverability of intercompany and third-party loans and receivables remains a matter of significance in our audit due to the level of judgement involved, the magnitude of the intercompany and third-party loans and receivables as well as uncertainties inherent in estimating the recoverable amounts.</p>	<p>The following audit procedures were performed among others:</p> <ul style="list-style-type: none"> • We obtained receivable confirmation responses on a sample basis and checked for evidence of subsequent cash collections. • We assessed the reasonability and appropriateness of management's assumptions, key inputs and judgements exercised by management in incorporating the estimated impact of COVID 19 in the ECL impairment model. • We re-performed the calculation of the impairment allowance by checking available industry data and the reasonableness of the loss rates applied by management. • We assessed the adequacy of the impairment allowance recognized in the general ledger and the adequacy of disclosures in the financial statements in relation to impairments recognized.

3. Impairment of investment in subsidiaries	
Refer to significant accounting policies (Note 2.2 & 2.14) and investment in subsidiaries (Note 22) in the separate financial statements.	
The Key audit matters	How the matter was addressed in our audit
<p>As disclosed in Note 22 to the financial statements, the carrying amount of the Company's investment in subsidiaries is significant. Some of these subsidiaries are currently loss making and a number of them are dependent on financial support mostly in the form of loans and advances from the parent Company for their ongoing operations.</p> <p>The Company applies the value in use methodology in accordance with IAS 36</p>	<p>The following audit procedures were performed among others:</p> <ul style="list-style-type: none"> • We held inquiry sessions with management to understand and evaluate the plans for the subsidiaries. • We assessed the reasonableness of the Company's forecasts by comparing them with historical performance.

<p><i>Impairment of assets</i> in estimating the recoverable amount for its investment in subsidiaries. Given the market volatility triggered by the COVID-19 pandemic, key parameters such as the discount rates were updated by the Directors for the impact of the pandemic.</p> <p>Judgement is required in estimating the recoverable amounts of the investments in subsidiaries and involves making assumptions regarding the future performance of the businesses, the inherent uncertainty involved in preparing forecasts/future cash flow projections and determining an appropriate discount rate.</p> <p>The significance of the amounts involved and the uncertainties inherent in estimating the recoverable amounts makes this a significant matter in our audit.</p>	<ul style="list-style-type: none"> • We assessed the objectivity of significant management judgments and assumptions related to impairment test for the subsidiaries. • We independently derived applicable discount rates and long-term growth rates from available external data and compared these with that used by management. • We considered the adequacy of the disclosures in the financial statements.
--	---

4. Inventory count observation and valuation of specialized inventory	
Refer to significant accounting policies (Note 2.11) and Inventories (Note 26) in the consolidated and separate financial statements.	
Key Audit Matter	How the matter was addressed in our audit
<p>The Group's inventories are warehoused in multiple geographical locations and consist mainly of raw materials, finished goods, engineering spares and consumables. The COVID-19 pandemic resulted in restriction of movement and social distancing thereby making observation of the year-end inventory count difficult.</p>	<p>The following audit procedures were performed among others:</p> <ul style="list-style-type: none"> • We assessed the design, implementation and operating effectiveness of relevant inventory management controls. • We observed the inventory count in major locations during the year and involved our IT specialists to perform quantity roll-forward from the date of the inventory count observation and compared the results to the inventory count report as at 31 March 2020.

<p>Included in the Group's Raw materials are un-bagged grains and granules which require specialized measurement.</p> <p>Furthermore, inventory is required to be measured at lower of cost and net realizable value, which requires a level of judgement relating to allowance for slow moving and or obsolete inventories.</p> <p>The risk of inaccurate inventory counts and the judgement inherent in inventory measurement and obsolescence makes inventory of significance to the audit.</p>	<ul style="list-style-type: none"> • We performed additional alternative procedures such as: <ul style="list-style-type: none"> ○ We assessed the competence and independence of the Group's internal audit function and involved them in the observation of the year-end inventory count exercise conducted at various inventory count locations. ○ We compared the internal audit function inventory observation count report to the inventory count report provided by management and selected items on a sample basis from the inventory count report and inspected underlying documentation to ascertain the existence of the inventory items. • We observed the specialized inventory measurement exercise conducted by the Company's expert remotely and assessed the reasonability of the inputs and assumptions used in the valuation of the specialized inventory. • We checked the appropriateness of the inventory costing on a sample basis. • We performed net realizable value tests to ascertain the reasonableness of the carrying value of inventory in the general ledger. • We assessed the adequacy of allowance for identified obsolete and slow-moving inventory items recorded in the general ledger.
--	---

5. Recognition and measurement of Derivatives – Forward exchange contracts and Non-Deliverable Forwards	
Refer to significant accounting policies (Note 2.8.6) and Derivatives (Notes 28, 45 & 46) in the consolidated and separate financial statements.	
Key Audit Matter	How the matter was addressed in our audit
<p>The Group purchases majority of its raw materials from foreign suppliers. The Group sources for foreign currencies used to purchase these raw materials from the NAFEX/Investors & Exporters (I&E) window via Letters of credits. Due to the scarcity of foreign currencies at the Investors & Exporters (I&E) window, the Company enters into forward exchange contracts to ensure it meets its foreign exchange requirements and to hedge against potential exchange risk.</p> <p>The valuation of the forward exchange contracts requires inputs and assumptions that are based on judgement and are subject to uncertainties. This makes recognition and measurement of derivatives a key audit matter.</p>	<p>The following audit procedures were performed among others:</p> <ul style="list-style-type: none"> • We obtained the listing of the derivative contracts and on a sample basis, inspected the underlying derivative contracts and checked the completeness of the contracts to bank confirmation responses obtained and to margin deposits made by the Company. • We obtained and inspected the valuation report of the external expert engaged by management to value the derivatives. • We checked the parameters in the valuation report to the derivative contracts obtained from management. • We engaged our KPMG valuation specialists to: <ul style="list-style-type: none"> ○ challenge the Company's assumptions with respect to the fair value of the derivative assets by comparing inputs in the Company's valuation model to externally available market data such as Nigerian Autonomous Foreign exchange rates (NAFEX). ○ assess whether the valuation model used by the Company and the inputs are reasonable and comply with the requirements of the relevant accounting standards. ○ recompute the fair value of the derivatives using inputs considered appropriate. • We assessed the adequacy of the disclosures in the financial statements in relation to the derivatives.

Other Information

The Directors are responsible for the other information. The other information comprises the Board of Directors, Officers and Other Corporate Information, Report of the Directors, Corporate Governance Report, Directors' Responsibilities in Relation to the Financial Statements and Audit Committee Report which we obtained prior to the date of this auditor's report, but does not include the consolidated and separate financial statements and our audit report thereon. Other information also includes the Chairman's statement, shareholders' information amongst others together the "Outstanding reports", which are expected to be made available to us after that date.

Our opinion on the consolidated and separate financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated and separate financial statements, our responsibility is to read the other information and in doing so, consider whether the other information is materially inconsistent with the consolidated and separate financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

When we read the Outstanding reports, if we conclude that there is a material misstatement therein, we are required to communicate the matter to those charged with governance

Responsibilities of the Directors for the Consolidated and Separate Financial Statements

The Directors are responsible for the preparation of consolidated and separate financial statements that give a true and fair view in accordance with IFRSs and in the manner required by the Companies and Allied Matters Act, Cap C.20, Laws of the Federation of Nigeria, 2004 and the Financial Reporting Council of Nigeria Act, 2011, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated and separate financial statements, the directors are responsible for assessing the Group and Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Group and Company or to cease operations, or have no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Consolidated and Separate Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated and separate financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated and separate financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group and Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.
- Conclude on the appropriateness of directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group and Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated and separate financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group and Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated and separate financial statements, including the disclosures, and whether the consolidated and separate financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with the Audit Committee regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the Audit Committee with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with Audit Committee, we determine those matters that were of most significance in the audit or the consolidated and separate financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on Other legal and Regulatory Requirements

Compliance with the requirements of Schedule 6 of the Companies and Allied Matters Act, Cap C.20, Laws of the Federation of Nigeria, 2004

In our opinion, proper books of account have been kept by the Company, so far as appears from our examination of those books and the Company's statement of financial position and statement of profit or loss and other comprehensive income are in agreement with the books of account.

The accompanying notes and significant accounting policies form an integral part of these financial statements

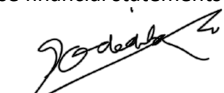

Flour Mills of Nigeria Plc

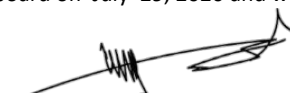

Annual Report for the year ended 31 March 2020

Notes to the Annual Report for the year ended 31 March 2020

1. Corporate information

1.1 Reporting entity

Flour Mills of Nigeria Plc (The Company) was incorporated in Nigeria as a private limited liability Company on 29 September 1960 and was converted to a public liability company in November 1978. Its registered head office is located at 1 Golden Penny Place, Apapa, Lagos. These financial statements comprise the Company and its subsidiaries (together referred to as the "Group").

1.2 Principal activities

The Group is primarily engaged in flour milling, production of pasta, noodles, edible oil and refined sugar, production of livestock feeds, farming and other agro-allied activities, distribution and sales of fertilizer, manufacturing and marketing of laminated woven polypropylene sacks and flexible packaging materials, development of real estate properties for rental, operation of terminals A and B at the Apapa Port, customs clearing, forwarding agents, shipping agents and logistics.

1.3 Going concern status

The financial statements have been prepared on a going concern basis. The Directors believe that there is no intention or threat from any source to curtail significantly the Company's lines of business in the foreseeable future. The directors have also evaluated the impact of the COVID-19 pandemic on its operations and financial position and believes the Group and Company have capacity to continue in business for the foreseeable future.

1.4 Ownership structure

Name of shareholder	No. of shares held	Percentage of share capital
Excelsior Shipping Company Limited	2,581,286,589	62.95
Other individuals and institutional shareholders	1,519,109,017	37.05
	4,100,395,606	100

The ultimate holding company is Excelsior Shipping Company Limited, a company registered in Liberia. The beneficial owner of Excelsior Shipping Company is a trust established by the late Mr. John S. Coumantaros.

1.5 Financial period

These consolidated and separate financial statements cover the financial period from 1 April 2019 to 31 March 2020, with comparatives for year ended 31 March 2019.

1.6 Statement of compliance

The consolidated and separate financial statements have been prepared in accordance with International Financial Reporting Standards issued by the International Accounting Standards Board (IASB) and the interpretations issued by the International Financial Reporting Interpretation Committee (IFRIC) and the requirements of the Companies and Allied Matters Act Cap C.20 Laws of Federation of Nigeria, 2004 and the Financial Reporting Council (FRC) of Nigeria Act, 2011.

The financial statements were authorised for issue by the board on 29 July 2020.

1.7 Basis of preparation

The financial statements have been prepared on the historical cost basis except for the following:

- Agricultural produce: Fair value less cost to sell.
- Non-bearer plant biological assets: Fair value where possible and cost where it is impossible to determine the fair value.
- Financial instruments: Initially measured at fair value and subsequently measured at amortised cost.
- Inventories: Lower of cost and net realisable value

Flour Mills of Nigeria Plc

Annual Report for the year ended 31 March 2020

Notes to the Annual Report for the year ended 31 March 2020

. Corporate information (continued)

- Defined benefits obligations: Present value of the obligation
- Investments in equity instruments: Fair value through other comprehensive income
- Derivative financial assets and liabilities: Fair value

1.8 Functional and presentation currency

For the purpose of these financial statements, the results and financial position of the Company and its subsidiaries are expressed in Naira, which is the functional currency of the Company, and the presentation currency for the Company and the Group financial statements.

All amounts have been rounded to the nearest thousand, unless otherwise indicated.

2. Significant accounting policies

The following accounting policies have been applied consistently to all periods presented in these financial statements, except if mentioned otherwise.

Changes in Accounting policies

The Group and Company adopted IFRS 16 Leases from 1 April 2019, the impact of the adoption of the new lease standards and changes in accounting policies are disclosed in Note 5.

The principal accounting policies applied in the preparation of these consolidated and separate annual report are set out below:

2.1 Segmental reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating-decision maker. The chief operating decision-maker, who is responsible for allocating resources and assessing performance of the operating segments, has been identified as the Board of Directors of Flour Mills of Nigeria Plc.

The Group's primary format for segment reporting is based on business operating segments. Where applicable, segment results, assets and liabilities include items directly attributable to a segment as well as those that can be allocated on a reasonable basis.

The basis of segmental reporting has been set out in note 8

2.2 Consolidation

Basis of consolidation

The consolidated financial statements incorporate the financial statements of the Parent company and its subsidiaries. The Group has power to exercise control over these subsidiaries. Control is exposure (right) to variable returns from an involvement with an investee and an ability to affect those returns through power over the investee. This is generally accompanied by a share of more than 50% of the voting rights.

The financial information of the subsidiaries are prepared as of the same reporting date and consolidated using consistent accounting policies. Subsidiaries are consolidated from the date on which control is transferred to the Group and are included until the date on which the Group ceases to control them.

All intra-group transactions, balances, income and expenses are eliminated in full on consolidation.

Non-controlling interests in the net assets of consolidated subsidiaries are identified and recognised separately from the Group's interest therein, and are recognised within equity. Losses of subsidiaries attributable to non-controlling interests are allocated to the non-controlling interest even if this results in a debit balance being recognised for non-controlling interest.

Transactions with non-controlling interest which result in change in ownership levels, where the Group has control of the subsidiary both before and after the transaction are regarded as equity transactions and are recognised directly in the statement of changes in equity.

Flour Mills of Nigeria Plc

Annual Report for the year ended 31 March 2020

Notes to the Annual Report for the year ended 31 March 2020

2.2 Consolidation (continued)

Business combinations

The Group accounts for business combinations using the acquisition method of accounting. The cost of the business combination is measured as the aggregate of the fair values of assets given (at the date of exchange), liabilities incurred or assumed and equity instruments issued by the Group in exchange for control of the acquiree. Costs directly attributable to the business combination are expensed as incurred in statement of profit or loss, except the costs to issue debt which are amortised as part of the effective interest and costs to issue equity which are included in equity.

When the consideration transferred by the Group in a business combination includes assets or liabilities resulting from a contingent consideration arrangement, the contingent consideration is measured at its acquisition-date fair value and included as part of the consideration transferred in a business combination. Changes in the fair value of the contingent consideration that qualify as measurement period adjustments are adjusted retrospectively, with corresponding adjustments against goodwill. Measurement period adjustments are adjustments that arise from additional information obtained during the 'measurement period' (which cannot exceed one year from the acquisition date) about facts and circumstances that existed at the acquisition date.

Contingent consideration is measured at fair value at the date of acquisition. If an obligation to pay contingent consideration that meets the definition of a financial instrument is classified as equity, then it is not remeasured and settlement is accounted for within equity. Otherwise, other contingent consideration is remeasured at fair value at each reporting date and subsequent changes in the fair value of the contingent consideration are recognised in profit or loss.

Where a business combination is achieved in stages, the Group's previously-held interests in the acquired entity are remeasured at fair value at the acquisition date (i.e. the date the Group attains control) and the resulting gain or loss, if any, is recognized in profit or loss. Amounts arising from interests in the acquiree prior to the acquisition date that have previously been recognized in other comprehensive income are reclassified to profit or loss, where such treatment would be appropriate if that interest were disposed of.

The acquiree's identifiable assets, liabilities and contingent liabilities that meet the conditions for recognition under IFRS 3, Business combinations are recognized and measured at their fair value at the acquisition date, except:

- deferred tax assets or liabilities arising from the assets acquired and liabilities assumed are measured in accordance with the Group's accounting policy on taxation.
- liabilities or assets related to employee benefit arrangements are recognised and measured in accordance with the Group's accounting policy on employee benefits; .
- assets (or disposal groups) that are classified as held for sale in accordance with the Group's accounting policy on Non-current Assets Held for Sale and Discontinued Operations are measured in accordance with the applicable Standard.

Goodwill is measured as the excess of the sum of the consideration transferred, the amount of any non-controlling interests in the acquiree, and the fair value of the acquirer's previously held equity interest in the acquiree (if any) over the net of the acquisition-date fair value of the identifiable assets acquired and the liabilities assumed. If, after reassessment, the net of the acquisition-date amounts of the identifiable assets acquired and liabilities assumed exceeds the sum of the consideration transferred, the amount of any non-controlling interests in the acquiree and the fair value of the acquirer's previously held interest in the acquiree (if any), the excess is recognised immediately in profit or loss as a bargain purchase gain.

Non-controlling interests that are present ownership interests and entitle their holders to a proportionate share of the entity's net assets in the event of liquidation may be initially measured either at fair value or at the non-controlling interests' proportionate share of the recognised amounts of the acquiree's identifiable net assets. The choice of measurement basis is made on a transaction-by-transaction basis. Other types of non-controlling interests are measured at fair value or, when applicable, on the basis specified in another IFRS.

Business combination of entities under common control

Business combinations in which all of the entities or businesses are ultimately controlled by the Group both before and after the combination and that control is not transitory are recognised as common control transactions. Where the transaction takes the form of a merger in which individual assets are acquired and liabilities assumed rather than the shares in the business being acquired, the acquirer accounts for such assets and liabilities at book value and the difference between the carrying value of the investments and the net assets acquired is recognised in retained earnings.

The result of the merged subsidiary is included in the separate financial statements of the existing entity as if the merger occurred at the beginning of the financial year.

Flour Mills of Nigeria Plc

Annual Report for the year ended 31 March 2020

Notes to the Annual Report for the year ended 31 March 2020

2.2 Consolidation (continued)

Interests in subsidiaries in Company separate financial statements

In the Company's separate financial statements, investment in subsidiaries are carried at cost less any accumulated impairment. The cost of an investment in a subsidiary is the aggregate of:

- the fair value, at the date of exchange, of assets given, liabilities incurred or assumed, and equity instruments issued by the company; plus
- any costs directly attributable to the purchase of the subsidiary.

Investments in subsidiaries are eliminated on consolidation in the Group financial statements.

Loss of Control

When the Group loses control over a subsidiary, it derecognises the assets and liabilities of the subsidiary and any related non-controlling interest and other component of equity. Any resulting gain or loss is recognised in profit or loss. Any interest retained in the former subsidiary is measured at fair value when control is lost.

2.3 Revenue from contracts with customers

Revenue represents the net value of goods sold (including delivery charges) to customers net of discounts and value added tax. Revenue is measured based on the consideration specified in a contract with a customer and excludes amounts collected on behalf of third parties. The group recognises revenue when it transfers control of a product or service to a customer.

Nature and timing of satisfaction of performance obligation, including significant payment terms

Customers gain control of goods when the goods have been delivered and accepted at their premises or when the goods are picked up by the customers. Invoices are generated at that point in time. Invoices are usually payable within 30 days. If it is probable that discounts will be granted and the amount can be measured reliably, then the discount is recognised as a reduction of revenue as the sales are recognised.

Revenue recognition

Revenue is recognised when the goods are delivered and have been accepted by customers at their premises or when the goods are picked up by the customer.

For contracts that permit the customer to return an item, revenue is recognised to the extent that it is highly probable that a significant reversal in the amount of cumulative revenue recognised will not occur. Therefore, the amount of revenue recognised is adjusted for expected returns, which are estimated based on the historical data. In these circumstances, a refund liability and a right to recover returned goods asset are recognised. The right to recover returned goods asset is measured at the former carrying amount of the inventory less any expected costs to recover goods. The Company reviews its estimate of expected returns at each reporting date and updates the amounts of the asset and liability accordingly.

Flour Mills of Nigeria Plc

Annual Report for the year ended 31 March 2020

Notes to the Annual Report for the year ended 31 March 2020

Revenue from contracts with customers (continued)

Rendering of services

Revenue represents the net value of services in respect of various services which includes haulage services, port services, packaging services e.t.c. rendered to third parties net of discounts and value added tax. The above services can be obtained from other providers and do not significantly customise or modify the sale of the Group's products. The Group recognises revenue from port and haulage services over time.

Advance payments received for goods yet to be delivered and services yet to be rendered by the Group/Company are recognized as customer deposit liabilities on the statement financial position and revenue is recognised as soon as goods have been delivered or services have been rendered.

2.4 Biological assets

Biological asset or agriculture produce is recognised only when the Group controls the asset as a result of past events, it is probable that future economic benefits will flow to the entity, and the fair value or cost of the asset can be measured reliably.

Biological assets comprise growing sugar cane, oil palm fresh fruit bunches and cassava as well as poultry. Biological assets are measured on initial recognition and subsequently at fair value less cost to sell.

Agricultural produce at the point of harvest are measured at fair value less cost to sell and are subsequently reclassified from agricultural produce to inventory and measured in accordance with the accounting policy on inventories.

Fair value gain or loss arising on initial and subsequent measurement is recognised in profit or loss and presented as part of cost of sale for the period in which it arises.

2.5 Investment property

Investment property are properties held for long term rental yields. Investment properties are carried in the Group statement of financial position at cost less accumulated depreciation. Cost includes transaction costs on initial recognition.

Investment property is initially measured at cost and depreciated on a straight line basis to allocate cost less residual values of the assets over their estimated useful lives.

Depreciation of Investment property is calculated on a straight line basis to allocate cost less residual values of the assets over their estimated useful lives.

Investment property (building) is depreciated over a useful life of 50 years.

Investment property is derecognised in the event of transfer of the investment property or the disposal of the investment property. Any gain or loss on disposal of investment property (calculated as the difference between the net proceeds from disposal and the carrying amount of the item) is recognised in profit or loss.

Rental income from the investment property is recognised as other revenue or income on a straight-line over the term of the lease. Lease incentives granted are recognised as an integral part of the total rental income over the term of the lease.

2.6 Property, plant and equipment

The cost of an item of property, plant and equipment is recognised as an asset when:

- it is probable that future economic benefits associated with the item will flow to the select entity; and
- the cost of the item can be measured reliably.

Property, plant and equipment is carried at cost less accumulated depreciation and accumulated impairment losses. Cost includes expenditure that is directly attributable to the acquisition of the items, including the capitalisation of borrowing costs on qualifying assets.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognised. All other repairs and maintenance are charged to profit or loss during the financial period in which they are incurred.

Flour Mills of Nigeria Plc

Annual Report for the year ended 31 March 2020

Notes to the Annual Report for the year ended 31 March 2020

2.6 Property, plant and equipment (continued)

When the use of a property changes from owner-occupied, the property is remeasured to fair value and reclassified accordingly. Any gain arising on this remeasurement, is recognised in profit or loss to the extent that it reverses a previous impairment loss on the specific property, with any remaining gain recognised in OCI and presented in the revaluation reserve. Any loss is recognised in profit or loss. However, to the extent that an amount is included in the revaluation surplus of that property, the loss is recognised in OCI and reduces the revaluation surplus within equity.

Depreciation is calculated on a straight-line basis at rates deemed appropriate to write off the cost of the assets less their residual values over their expected useful lives.

Depreciation is recognised so as to write off the cost of assets (other than properties under construction) less their residual values over their useful lives, using the straight-line method, on the following bases:

Item	Average useful life
Buildings	50 years
Plant and machinery	5-25 years
Furniture and equipment	3-10 years
Motor vehicles	4-5 years
Mature bearer plants	25-35 years
Freehold land	Not depreciated
Berth rehabilitation	Over the lease period

The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in profit or loss.

Assets in the course of construction (capital work-in-progress) are carried at cost, less any recognised impairment losses. Cost includes professional fees and for qualifying assets borrowing costs capitalised in accordance with the Group's accounting policy. Assets in the course of construction are not depreciated until they get to the stage of intended use.

Immature bearer plants are carried at cost and represents bearer plants that have been planted but have not reached a matured stage and have not started yielding biological assets. They are not depreciated.

2.7 Intangible assets

An intangible asset is recognised when:

- it is probable that the expected future economic benefits that are attributable to the asset will flow to the entity; and
- the cost of the asset can be measured reliably.

Intangible assets are initially recognised at cost.

Intangible assets acquired separately

Intangible assets with finite useful lives that are acquired separately are carried at cost less accumulated amortisation and accumulated impairment losses. Amortisation is recognised on a straight-line basis over their estimated useful lives. The estimated useful life and amortisation method are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis. Intangible assets with indefinite useful lives that are acquired separately are carried at cost less accumulated impairment losses.

Amortisation is recognised so as to write-off the cost of finite intangible assets, over their useful lives, using the straight-line method, on the following bases:

Item	Useful life
Computer software	3 - 5years

Flour Mills of Nigeria Plc

Annual Report for the year ended 31 March 2020

Notes to the Annual Report for the year ended 31 March 2020

2.7 Intangible assets (continued) - Derecognition of intangible assets

An intangible asset is derecognised on disposal, or when no future economic benefits are expected from use or disposal. Gains or losses arising from derecognition of an intangible asset, measured as the difference between the net disposal proceeds and the carrying amount of the asset, are recognised in profit or loss when the asset is derecognised.

2.8 Financial instruments

i. Recognition and initial measurement:

All financial instruments are measured initially at fair value plus directly attributable transaction costs and fees, except for those financial instruments that are subsequently measured at fair value where such transaction costs and fees are immediately recognized in profit or loss. Financial instruments are recognized (derecognized) on the date the Group commits to purchase (sell) the instruments (trade date accounting).

The Group and Company classifies financial instruments, or their component parts, on initial recognition as a financial asset, a financial liability or an equity instrument in accordance with the substance of the contractual arrangement.

For financial instruments which are not at fair value through profit or loss, transaction costs are included in the initial measurement of the instrument.

Transaction costs on financial instruments at fair value through profit or loss are recognised in profit or loss.

ii. Classification and subsequent measurement

Financial assets

On initial recognition, a financial asset is classified as measured at: amortised cost; fair value through OCI (FVOCI) - debt investment; FVOCI - equity investment; or fair value through profit or loss (FVTPL).

Financial assets are not reclassified subsequent to their initial recognition unless the Group and Company changes its business model for managing financial assets, in which case all affected financial assets are reclassified on the first day of the first reporting period following the change in the business model.

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at FVTPL:

- it is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal interest on the principal amount outstanding.

All financial assets not classified as measured at amortised cost or FVOCI as described above are measured at FVTPL. On initial recognition, the Group may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortised cost or at FVOCI as at FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

Financial assets - Business model assessment

The Group and Company makes an assessment of the objective of the business model in which a financial assets is held at a portfolio level because this best reflects the way the business is managed and information is provided to management. The following considered includes:

- the stated policies and objectives for the portfolio and the operation of those policies in practice. These include whether management's strategy focuses on earning contractual interest income, maintaining a particular interest rate profile, matching the duration of the financial assets to the duration of any related liabilities or expected cash outflows or realizing cash flows through the sale of the assets;
- how the performance of the portfolio is evaluated and reported to the Group and Company's management;
- the risks that affect the performance of the business model (and the financial assets held within that business model) and how those risks are managed;

Flour Mills of Nigeria Plc

Annual Report for the year ended 31 March 2020

Notes to the Annual Report for the year ended 31 March 2020

Financial instruments (continued)

- how managers of the business are compensated - e.g. whether compensation is based on the fair value of the assets managed or the contractual cash flows collected; and
- the frequency, volume and timing of sales of financial assets in prior periods, the reasons for such sales and expectations about future sales activity.

Transfers of financial assets to third parties in transactions that do not qualify for derecognition are not considered sales for this purpose, consistent with the Group and Company's continuing recognition of the assets. Financial assets that are held for trading or are managed and whose performance is evaluated on a fair value basis are measured at FVTPL.

Financial assets - Assessment whether contractual cash flows are solely payments of principal and interest

For the purposes of this assessment, 'principal' is defined as the fair value of the financial asset on initial recognition. Interest is defined as consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs (e.g. liquidity risk and administrative costs), as well as a profit margin.

In assessing whether the contractual cash flows are solely payments of principal and interest, the Group and Company consider the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition. In making this assessment, the Group and Company considers:

- contingent events that would change the amount or timing of cash flows;
- terms that may adjust the contractual coupon rate, including variable-rate features;
- prepayment and extension features; and
- terms that limit the Group's claim to cash flows from specified assets (e.g. non-recourse features)

A prepayment feature is consistent with the solely payments of principal and interest criterion if the prepayment amount substantially represents unpaid amounts of principal and interest on the principal amount outstanding, which may include reasonable additional compensation for early termination of the contract.

Additionally, for a financial asset acquired at a discount or premium to its contractual par amount, a feature that permits or requires prepayment at an amount that substantially represents the contractual par amount plus accrued (but unpaid) contractual interest (which may also include reasonable additional compensation for early termination) is treated as consistent with this criterion if the fair value of the prepayment feature is insignificant at initial recognition.

Financial instruments held by the Group are classified in accordance with the provisions of IFRS 9 Financial Instruments. On initial recognition, a financial asset is classified as measured at: amortised cost; fair value through other comprehensive income; or fair value through profit or loss.

Broadly, the classification possibilities, which are adopted by the Group, as applicable, are as follows:

Financial assets which are equity instruments:

- Designated as at fair value through other comprehensive income. (This designation is not available to equity instruments which are held for trading or which are contingent consideration in a business combination).

Financial assets which are debt instruments:

- Amortised cost. (This category applies only when the contractual terms of the instrument give rise, on specified dates, to cash flows that are solely payments of principal and interest on principal, and where the instrument is held under a business model whose objective is met by holding the instrument to collect contractual cash flows); or
- Fair value through other comprehensive income. (This category applies only when the contractual terms of the instrument give rise, on specified dates, to cash flows that are solely payments of principal and interest on principal, and where the instrument is held under a business model whose objective is achieved by both collecting contractual cash flows and selling the instruments); or

Flour Mills of Nigeria Plc

Annual Report for the year ended 31 March 2020

Notes to the Annual Report for the year ended 31 March 2020

Financial instruments (continued)

Derivatives which are not part of a hedging relationship:

- Mandatorily at fair value through profit or loss.

Financial liabilities:

- Amortised cost; or

On initial recognition, the Group may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortised cost of FVOCI as at FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

Financial assets - Subsequent measurement and gains and losses

Financial assets at FVTPL	These assets are subsequently measured at fair value. Net gains and losses, including any interest or dividend income, are recognised in profit or loss.
Financial assets at amortised cost	These assets are subsequently measured at amortised cost using the effective interest method. The amortised cost is reduced by impairment losses. Interest income, foreign exchange gains and losses and impairment are recognised in profit or loss. Any gain or loss on derecognition is recognised in profit or loss.
Debt investments at FVOCI	These assets are subsequently measured at fair value. Interest income calculated using the effective interest method, foreign exchange gains and losses and impairment are recognised in OCI and are reclassified to profit or loss.
Equity investment at FVOCI	These assets are subsequently measured at fair value. Dividends are recognised as income in profit or loss unless the dividend clearly represents a recovery of part of the cost of the investment. Other net gains and losses are recognised in OCI and are never reclassified to profit or loss.

Note 45 Financial instruments and risk management presents the financial instruments held by the Group based on their specific classifications.

Derecognition

The Group and Company derecognise a financial asset when the contractual rights to the cash flows from the financial asset expire, or it transfers the right to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial assets are transferred or in which the Group and Company neither transfers nor retains substantially all of the risks and rewards of ownership and it does not retain control of the financial asset.

The Group and Company enters into transactions whereby it transfers assets recognised in its statement of financial position, but retains either all or substantially all of the risks and rewards of the transferred assets. In these cases, the transferred assets are not derecognised.

The Group derecognise a financial liability when its contractual obligations are discharged or cancelled or expire. The Group and Company also derecognises a financial liability when its terms are modified and the cash flows of the modified liability are substantially different, in which case a new financial liability based on the modified terms is recognised at fair value.

On derecognition of financial liability, the difference between the carrying amount extinguished and the consideration paid (including any non-cash assets transferred or liabilities assumed) is recognised in profit or loss.

On derecognition of a financial asset other than in its entirety (e.g. when the entity retains an option to repurchase part of a transferred asset), the entity allocates the previous carrying amount of the financial asset between the part it continues to recognise under continuing involvement, and the part it no longer recognises on the basis of the relative fair value of those parts on the date of the transfer. The difference between the carrying amount allocated to the part that is no longer recognised and the sum of the consideration received for the part no longer recognised and any cumulative gain or loss. A cumulative gain or loss that had been recognised in other comprehensive income is allocated between the part that continues to be recognised and the part that is no longer recognised on the basis of the relative fair values of those parts.

The Group derecognises a financial liability only when its obligation is settled, cancelled or expired.

2.8.1 Trade and other receivables

Classification

Trade and other receivables, excluding, when applicable, VAT and prepayments, are classified as financial assets subsequently measured at amortised cost (note 27).

They have been classified in this manner because their contractual terms give rise, on specified dates to cash flows that are solely payments of principal and interest on the principal outstanding, and the Group's business model is to collect the contractual cash flows on trade and other receivables.

Flour Mills of Nigeria Plc

Annual Report for the year ended 31 March 2020

Notes to the Annual Report for the year ended 31 March 2020

Financial instruments (continued)

Impairment

Financial instruments and contract assets

The Group and Company recognises loss allowances for Expected Credit Losses (ECLs) on:

- financial assets measured at amortised cost;
- debt investments measured at FVOCI; and
- contract assets

The Group and Company measure loss allowances at an amount equal to lifetime ECLs, except for the following, which are measured at 12-month ECLs:

- debt securities that are determined to have low credit risk at the reporting date; and
- other debt securities and bank balances for which credit risk (i.e. the risk of default occurring over the expected life of the financial instrument) has not increased significantly since initial recognition.

Loss allowances for trade receivables are always measured at an amount equal to lifetime ECLs using a simplified impairment methodology adjusted for current conditions and forward looking information.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating ECLs, the Group and Company consider reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Group and Company's historical experience and informed credit assessment and including forward- looking information.

The Group and Company assumes that the credit risk on a financial asset has increased significantly if it is more than 30 days past due.

The Group and Company considers a financial asset to be in default when;

- the borrower is unlikely to pay its credit obligation to the Company in full, without recourse by the Company to actions such as realizing security (if any is held); or
- the financial asset is more than 90 days past due.

Lifetime ECLs are the ECLs that result from all possible default events over the expected life of a financial instrument.

12-month ECLs are the portion of ECLs that result from default events that are possible within the 12 months after the reporting date (or a shorter period if the expected life of the instrument is less than 12 months)

The maximum period considered when estimating ECLs is the maximum contractual period over which the Group and Company is exposed to credit risk.

Flour Mills of Nigeria Plc

Annual Report for the year ended 31 March 2020

Notes to the Annual Report for the year ended 31 March 2020

Financial instruments (continued)

Measurement of ECLs

ECLs are a probability-weighted estimate of credit losses. Credit losses are measured as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the entity in accordance with the contract and the cash flows that the Group and Company expects to receive).

ECLs are discounted at the effective interest rate of the financial asset.

Credit impaired financial assets

At each reporting date, the Company assesses financial assets carried at amortised cost are credit-impaired. A financial asset is "credit-impaired" when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred. Evidence that a financial asset is credit impaired includes the following observable data:

- significant financial difficulty of the borrower or issuer;
- it is probable that the borrower will enter bankruptcy or other financial reorganisation; or
- a breach of contract such as a default or being more than 90 days past due.

Loss allowance for the financial assets measured at amortised cost are deducted from the gross carrying amount of the assets.

Presentation of allowance for ECL in the Statement of Financial Position

Loss allowance for financial assets measured at amortised costs are deducted from the gross carrying amount of the assets.

For debt securities at FVOCI, the loss allowances is charged to profit or loss and is recognised in OCI.

Write-off

The gross carrying amount of a financial asset is written off when the Group and Company have no reasonable expectations of recovering a financial asset in its entirety or a portion thereof. For individual customers, the Group has a policy of writing off the gross carrying amount when the financial asset is 1 year past due based on historical experience of recoveries of similar assets. For corporate customers, the Group individually makes an assessment with respect to the timing and amount of write-off based on whether there is a reasonable expectation of recovery. The Group and Company expect no significant recovery from the amount written off. However, financial assets that are written off could still be subject to enforcement activities in order to comply with the Group's procedure for recovery of amounts due. Any recovery made is recognised in profit or loss.

2.8.2 Cash and cash equivalents

Cash and cash equivalents comprise cash in hand, current balances with banks and similar institutions, bank overdrafts and highly liquid investments generally with maturities of three months or less. Term deposit with tenor of 1 year or less are also included in cash and cash equivalents if they are held for short term cash commitments rather than for investment or other purposes. Cash equivalents are readily convertible into known amounts of cash and have an insignificant risk of changes in value. Cash and cash equivalents are stated at carrying amount which is deemed to be fair value.

2.8.3 Borrowings and loans from related parties

Recognition and measurement

Borrowings and loans from related parties are recognised when the Group and Company becomes a party to the contractual provisions of the loan. The loans are measured at initial recognition, at fair value plus transaction costs if any.

They are subsequently measured at amortised cost using the effective interest method.

The effective interest method is a method of calculating the amortised cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial liability, or (where appropriate) a shorter period, to the amortised cost of a financial liability.

Interest expense, calculated on the effective interest method, is included in profit or loss in finance costs (Note 14.)

Borrowings expose the Group and Company to liquidity risk and interest rate risk. Refer to Note 45 for details of risk exposure and management thereof.

Flour Mills of Nigeria Plc

Annual Report for the year ended 31 March 2020

Notes to the Annual Report for the year ended 31 March 2020

Financial instruments (continued)

2.8.4 Trade and other payables

Recognition and measurement

They are recognised when the Group and Company becomes a party to the contractual provisions, and are measured, at initial recognition, at fair value plus transaction costs, if any.

They are subsequently measured at amortised cost using the effective interest method.

The effective interest method is a method of calculating the amortised cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial liability, or (where appropriate) a shorter period, to the amortised cost of a financial liability.

If trade and other payables contain a significant financing component, and the effective interest method results in the recognition of interest expense, then it is included in profit or loss in finance costs (Note 14).

Trade and other payables expose the Group and Company to liquidity risk and possibly to interest rate risk. Refer to note 45 for details of risk exposure and management thereof.

2.8.5 Bank overdrafts

Bank overdrafts are initially measured at fair value, and are subsequently measured at amortised cost, using the effective interest rate method.

Flour Mills of Nigeria Plc

Annual Report for the year ended 31 March 2020

Notes to the Annual Report for the year ended 31 March 2020

Financial instruments (continued)

2.8.6 Derivatives and hedge accounting

Classification

The Group and Company holds derivative financial instruments to hedge its foreign currency and interest rate risk exposures.

Derivatives embedded in other financial instruments or other non-financial host contracts are treated as separate derivatives when their risks and characteristics are not closely related to those of the host contract and the host contract is not carried at fair value with unrealised gains or losses reported in profit or loss.

At inception of the designated hedging relationship, the Group and Company documents the risk management objective and strategy for undertaking the hedge. The Group and Company also documents the economic relationship between the hedged item and the hedging instrument, including whether the changes in cash flows of the hedged item and hedging instrument are expected to offset each other.

The Group and Company enters into a variety of derivative financial instruments in order to manage its exposure to foreign exchange risk and interest rate risk. Derivatives held by the Group and Company which are not in designated hedging relationships, include forward exchange contracts. (Note 28).

Recognition and measurement

Derivatives are recognised when the Group and Company becomes a party to the contractual provisions of the instrument. They are measured, at initial recognition and subsequently, at fair value. Directly attributed transaction costs are also recognised in profit or loss.

Fair value gains or losses are included in other operating gains (losses) (Note 9). Details of the valuation policies and processes are presented in Note 46.

2.8.7 Offsetting

Financial assets and financial liabilities are offset and the net amount presented in the statement of financial position when, and only when, the Group and Company currently have a legally enforceable right to set off the amounts and it intends either to settle them on a net basis or to realise the asset and settle the liability simultaneously.

2.8.8 Derecognition

Financial assets

The Group and Company derecognises a financial asset only when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another party or in which the Group and Company neither transfer nor retains substantially all of the risks and rewards of ownership and it does not retain control of the financial asset. If the Group and Company neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Group and Company recognises its retained interest in the asset and an associated liability for amounts it may have to pay. If the Group and Company retains substantially all the risks and rewards of ownership of a transferred financial asset, the Group continues to recognise the financial asset and also recognises a collateralised borrowing for the proceeds received.

Financial liabilities

The Group and Company derecognises financial liabilities when, and only when, the Group and Company obligations are discharged, cancelled or they expire. The Group and Company also derecognises a financial liability when its terms are modified and the cash flows of the modified liability are substantially different, in which case a new financial liability based on the modified terms is recognised at fair value. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable, including any non-cash assets transferred or liabilities assumed, is recognised in profit or loss.

Flour Mills of Nigeria Plc

Annual Report for the year ended 31 March 2020

Notes to the Annual Report for the year ended 31 March 2020

2.9 Taxation

Income tax expense comprises current tax (company income tax, tertiary education tax, Nigeria Police Trust Fund levy) and deferred tax. It is recognised in profit or loss except to the extent that it relates to a business combination, or items recognised directly in equity or in other comprehensive income.

Current tax

The current tax is based on taxable profit for the year and any adjustment in respect of previous years. Taxable profit differs from profit as reported in the consolidated and separate statement of profit or loss and other comprehensive income because of items of income or expense that are taxable or deductible in future years and items that are never taxable or deductible. The amount of current tax is the best estimate of the tax amount expected to be paid or received that reflects uncertainty related to income taxes, if any. The Group and Company's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period. Current tax assets and liabilities are offset only if certain criteria are met. Minimum tax

Minimum tax, which is based on a gross amount is outside the scope of IAS 12 and therefore not presented as part of income tax expense in the profit or loss. Minimum tax is computed as 0.5% of turnover less franked investment income and it is applicable to companies with no total profit or companies whose computed tax is less than the minimum tax. The Group and the Company recognises minimum tax payable to the tax authority as part of its company income tax payable in the statement of financial position.

Nigeria Police Trust Fund levy-Nigeria Police Trust Fund levy is based on the Net profit of the Company and is governed by the Nigeria Police Trust Fund (Establishment) Act, 2019.

Implementation of Finance Act

The Finance Act (the Act) introduced sweeping changes to the Nigerian tax laws; the amendments were generally to promote fiscal equity, align local tax laws with global best practices and support small businesses in line with the Ease of doing business reforms. The Act also provided clarification on controversial and unclear areas of the tax laws.

The Federal Inland Revenue Service (FIRS) recently issued circulars to provide guidance to taxpayers on the transition process and implementation of the changes in the Act.

The Company has reviewed the amendments introduced by the Finance Act, evaluated the impact of the changes on its operations and has put in place mechanisms to align with the new tax laws. The Company also constantly reviews its operations to ensure that the changes have been implemented appropriately and confirm compliance with the new laws.

Accounting for uncertain tax treatments

Uncertainty over Income Tax Treatments

The interpretation clarifies how to apply the recognition and measurement requirements in IAS 12 when there is uncertainty over income tax treatments. Specifically, if it is probable that the tax authorities will accept the uncertain tax treatment, then all tax related items are measured according to the planned tax treatment. If it is not probable that the tax authorities will accept the uncertain tax treatment, then the tax related items are measured on the basis of the probabilities to reflect the uncertainty. Changes in facts and circumstances are required to be treated as changes in estimates and applied prospectively.

The Company has applied IFRIC 23 by evaluating the cumulative effect of initially applying the interpretation as an adjustment to the opening balance of retained earnings of the annual reporting period. At the date of initial transition, there were no adjustments relating to uncertainty over income taxes recorded in the opening balance of retained earnings. The Company's compliance framework ensures that the tax treatment accorded to its operations is in line with the enacted tax laws.

The Company's judgements with respect to income taxes are based on the likelihoods that the tax authority will accept an uncertain tax treatment that has been taken or is expected to be taken on its tax returns. The Company specifically reviews whether its tax treatments are consistent with requirements and recommendations of the tax laws while ensuring its proper coverage of avoidable tax risks and exposures in process.

Flour Mills of Nigeria Plc

Annual Report for the year ended 31 March 2020

Notes to the Annual Report for the year ended 31 March 2020

2.9 Taxation (continued)

The Company measures the impact of uncertainty using the method that best predicts the resolution of the uncertainty ; either the most likely amount method or the expected value method. Furthermore, the judgements and estimates made to recognize and measure the effect of uncertain tax treatments are reassessed whenever circumstances change or when there is new information that affect those judgments.

The Company did not adopt any uncertain tax position during the year and therefore, no provision has been made in this regard.

Deferred tax assets and liabilities

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the consolidated and separate financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are generally recognised for unused tax losses and for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised. Such deferred tax assets and liabilities are not recognised if the temporary difference arises from goodwill or from the initial recognition (other than in a business combination) of other assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

Deferred tax liabilities are recognised for taxable temporary differences associated with investments in subsidiaries and associates, and interests in joint ventures, except where the Group is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred tax assets arising from deductible temporary differences associated with such investments and interests are only recognised to the extent that it is probable that there will be sufficient taxable profits against which the benefits of the temporary differences will be utilised and they are expected to reverse in the foreseeable future.

Future taxable profits are determined based on the reversal of relevant taxable temporary differences. If the amount of taxable temporary differences is insufficient to recognise a deferred tax asset in full, then future taxable profits, adjusted for reversals of existing temporary differences, are considered, based on the business plans for individual subsidiaries in the Group.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Group expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

Current and deferred tax are recognised in profit or loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively. Where current tax or deferred tax arises from the initial accounting for a business combination, the tax effect is included in the accounting for the business combination.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Company intends to settle its current tax assets and liabilities on a net basis.

2.10 Leases

Policy applicable before 1 April 2019.

Arrangement that contains a lease

At inception of an arrangement, the Group determines whether the arrangement is or contains a lease.

Flour Mills of Nigeria Plc

Annual Report for the year ended 31 March 2020

Notes to the Annual Report for the year ended 31 March 2020

2.10 Leases (continued)

At inception or on reassessment of an arrangement that contains a lease, the Group separates payments and other consideration required by the arrangement into those for the lease and those for other elements on the basis of their relative fair values. If the Group concludes for a finance lease that it is impracticable to separate the payments reliably, then an asset and a liability are recognised at an amount equal to the fair value of the underlying asset; subsequently, the liability is reduced as payments are made and an imputed finance cost on the liability is recognised using the Group's incremental borrowing rate.

A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership. All other leases are classified as operating leases.

Operating lease payments are recognised as an expense on a straight line basis over the lease term, except where another systematic basis is more representative of the time pattern in which economic benefits from the leased assets are consumed. Contingent rentals arising under operating leases are recognised as an expense in the period in which they are incurred.

In the event that lease incentives are received to enter into operating leases, such incentives are recognised as a liability. The aggregate benefit of incentives is recognised as a reduction of rental expense on a straight line basis except where another systematic basis is more representative of the time pattern in which economic benefits from the leased assets are consumed.

Rental income from letting property is recognised in the profit or loss on a straight-line basis over the term of the lease. Lease incentives granted are considered as an integral part of the total rental income and recognised over the term of the lease. Rental income are recognised in investment income in the Group financial statement.

Finance leases - lessee

Finance leases are recognised as assets and liabilities in the consolidated and separate statement of financial position at amounts equal to the fair value of the leased property or, if lower, the present value of the minimum lease payments. The corresponding liability to the lessor is included in the consolidated and separate statement of financial position as a finance lease obligation.

The discount rate used in calculating the present value of the minimum lease payments is the interest rate implicit in the lease.

The lease payments are apportioned between the finance charge and reduction of the outstanding liability. The finance charge is allocated to each period during the lease term so as to produce a constant periodic rate on the remaining balance of the liability.

Operating leases - lessor

Operating lease income is recognised as an income on a straight-line basis over the lease term.

Initial direct costs incurred in negotiating and arranging operating leases are added to the carrying amount of the leased asset and recognised as an expense over the lease term on the same basis as the lease income.

Operating leases - lessee

Operating lease payments are recognised as an expense on a straight-line basis over the lease term. The difference between the amounts recognised as an expense and the contractual payments are recognised as an operating asset.

Any contingent rents are expensed in the period they are incurred.

Policy applicable from 1 April 2019

The Group has applied IFRS 16 using the modified retrospective approach and therefore the comparative information has not been restated and continues to be reported under IAS 17 and IFRIC 4. The details of accounting policies under IAS 17 and IFRIC 4 are disclosed separately.

At inception of a contract, the Group assesses whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Group uses the definition of a lease in IFRS 16.

This policy is applied to contracts entered into, on or after 1 April 2019.

Flour Mills of Nigeria Plc

Annual Report for the year ended 31 March 2020

Notes to the Annual Report for the year ended 31 March 2020

2.10 Leases (continued)

i. As a lessee

At commencement or on modification of a contract that contains a lease component, the Group allocates the consideration in the contract to each lease component on the basis of its relative stand-alone prices. However, for the leases of property the Group has elected not to separate non-lease components and account for the lease and non-lease components as a single lease component.

The Group recognises a right-of-use asset and a lease liability at the lease commencement date. The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received.

The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the end of the lease term, unless the lease transfers ownership of the underlying asset to the Group by the end of the lease term or the cost of the right-of-use asset reflects that the Group will exercise a purchase option. In that case the right-of-use asset will be depreciated over the useful life of the underlying asset, which is determined on the same basis as those of property and equipment. In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted for certain remeasurements of the lease liability.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Group's incremental borrowing rate. Generally, the Group uses its incremental borrowing rate as the discount rate.

The Group determines its incremental borrowing rate by obtaining interest rates from various external financing sources and makes certain adjustments to reflect the terms of the lease and type of the asset leased.

Lease payments included in the measurement of the lease liability comprise the following:

- fixed payments, including in-substance fixed payments;
- variable lease payments that depend on an index or a rate, initially measured using the index or rate as at the commencement date;
- amounts expected to be payable under a residual value guarantee; and
- the exercise price under a purchase option that the Group is reasonably certain to exercise, lease payments in an optional renewal period if the Group is reasonably certain to exercise an extension option, and penalties for early termination of a lease unless the Group is reasonably certain not to terminate early.

The lease liability is measured at amortised cost using the effective interest method. It is remeasured when there is a change in future lease payments arising from a change in an index or rate, if there is a change in the Group's estimate of the amount expected to be payable under a residual value guarantee, if the Group changes its assessment of whether it will exercise a purchase, extension or termination option or if there is a revised in-substance fixed lease payment.

When the lease liability is remeasured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use asset, or is recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero.

The Group presents right-of-use assets that do not meet the definition of investment property in 'property, plant and equipment' and lease liabilities in 'loans and borrowings' in the statement of financial position.

ii. As a lessor

At inception or on modification of a contract that contains a lease component, the Group allocates the consideration in the contract to each lease component on the basis of their relative stand-alone prices.

When the Group acts as a lessor, it determines at lease inception whether each lease is a finance lease or an operating lease.

To classify each lease, the Group makes an overall assessment of whether the lease transfers substantially all of the risks and rewards incidental to ownership of the underlying asset. If this is the case, then the lease is a finance lease; if not, then it is an operating lease. As part of this assessment, the Group considers certain indicators such as whether the lease is for the major part of the economic life of the asset.

Flour Mills of Nigeria Plc

Annual Report for the year ended 31 March 2020

Notes to the Annual Report for the year ended 31 March 2020

2.10 Leases (continued)

When the Group is an intermediate lessor, it accounts for its interests in the head lease and the sub-lease separately. It assesses the lease classification of a sub-lease with reference to the right-of-use asset arising from the head lease, not with reference to the underlying asset. If a head lease is a short-term lease to which the Group applies the exemption described above, then it classifies the sub-lease as an operating lease.

If an arrangement contains lease and non-lease components, then the Group applies IFRS 15 to allocate the consideration in the contract.

The Group applies the derecognition and impairment requirements in IFRS 9 to the net investment in the lease. The Group further regularly reviews estimated unguaranteed residual values used in calculating the gross investment in the lease.

The Group recognises lease payments received under operating leases as income on a straight-line basis over the lease term as part of 'other revenue'.

Generally, the accounting policies applicable to the Group as a lessor in the comparative period were not different from IFRS 16 except for the classification of the sub-lease entered into during current reporting period that resulted in a finance lease classification.

The Group has elected not to recognise right of use asset and lease liabilities for leases of short term and low value assets. The Group recognises the lease payments associated with these leases as an expense on a straight line over the lease term.

2.11 Inventories

Inventories are measured at the lower of cost and net realisable value. Cost comprises direct materials and, where applicable, direct labour costs and those overheads that have been incurred in bringing the inventories to their present location and condition. Net realisable value represents the estimated selling price less all estimated costs of completion and costs to be incurred in marketing, selling and distribution.

The basis of costing of different Inventory types are as follows:

Raw materials, components: Purchase cost including transportation and other incidental cost on a First In First Out (FIFO) basis.

Goods in transit: Purchase cost incurred to date and other incidental costs and recognised as part of raw materials, consumable stores and maintenance spares as applicable

Work in progress: Weighted average cost

Finished goods: Purchase cost of direct materials, labour and a reasonable allocation of overheads based on normal operating capacity on a weighted average basis.

Harvested agricultural produce: Fair value less cost to sell at the point of harvest.

Consumable stores and maintenance spares: Weighted average cost.

The amount of any write-down of inventories to net realisable value and all losses of inventories are recognised as an expense in the period the write-down or loss occurs. The amount of any reversal of any write-down of inventories, arising from an increase in net realisable value, are recognised as a reduction in the amount of inventories recognised as an expense in the period in which the reversal occurs.

Inventories includes a "right to returned goods asset" which represents the Group right to recover products from customers where customers exercise their right of return under the Group returns policy. The Group uses its accumulated historical experience to estimate the number of returns on a portfolio level using the expected value method. A corresponding adjustment is recognised against cost of sales.

2.12 Goodwill

Goodwill represents the excess of the consideration over the fair value of the net identifiable assets of the acquired entity at the date of the acquisition. Goodwill arising on an acquisition of a business is carried at cost as established at the date of acquisition of the business less accumulated impairment losses, if any.

The excess of the purchase price over the carrying amount of non-controlling interest, when the Group increases its interest in an existing subsidiary, is recognised in equity. Goodwill is tested annually for impairment. Impairment losses on goodwill are not reversed. Gains and losses on the disposal of an entity include the carrying amount of goodwill relating to the entity sold.

Flour Mills of Nigeria Plc

Annual Report for the year ended 31 March 2020

Notes to the Annual Report for the year ended 31 March 2020

2.12 Goodwill (continued)

Goodwill is allocated to cash-generating units for the purpose of impairment testing. The allocation is made to those cash generating units or Groups of cash-generating units that are expected to benefit from the business combination.

2.13 Non-current assets (disposal groups) held for sale or distribution to owners

Non-current assets and disposal groups are classified as held for sale if their carrying amount will be recovered through a sale transaction rather than through continuing use. This condition is regarded as met only when the sale is highly probable and the asset (or disposal group) is available for immediate sale in its present condition. Management must be committed to the sale, which should be expected to qualify for recognition as a completed sale within one year from the date of classification.

Non-current assets and disposal groups are classified as held for distribution to owners when the entity is committed to distribute the asset or disposal group to the owners. This condition is regarded as met only when the distribution is highly probable and the asset (or disposal group) is available for immediate distribution in its present condition, provided the distribution is expected to be completed within one year from the classification date.

Non-current assets (or disposal groups) held for sale (distribution to owners) are measured at the lower of their carrying amount and fair value less costs to sell (distribute).

A non-current asset is not depreciated (or amortised) while it is classified as held for sale (held for distribution to owners), or while it is part of a disposal group classified as such.

Interest and other expenses attributable to the liabilities of a disposal group classified as held for sale (distribution to owners) are recognised in profit or loss.

2.14 Impairment of tangible and intangible assets excluding goodwill, inventories, deferred tax assets and financial assets

At the end of each reporting period, the Group reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). When it is not possible to estimate the recoverable amount of an individual asset, the Group estimates the recoverable amount of the cash-generating unit to which the asset belongs. When a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest Group of cash-generating units for which a reasonable and consistent allocation basis can be identified.

Intangible assets with indefinite useful lives and intangible assets not yet available for use are tested for impairment at least annually, and whenever there is an indication that the asset may be impaired. Whenever such indication exists, the assets recoverable amount is estimated. The impairment is the carrying amount less the recoverable amount of the assets.

Recoverable amount is the higher of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognised immediately in the profit or loss, unless the relevant asset is carried at a revalued amount, in which case the impairment loss is treated as a revaluation decrease.

When an impairment loss subsequently reverses, the carrying amount of the asset (or a cash-generating unit) is increased to the revised estimate of its recoverable amount, but the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (or cash-generating unit) in prior years. A reversal of an impairment loss is recognised immediately in the income statement, unless the relevant asset is carried at a revalued amount, in which case the reversal of the impairment loss is treated as a revaluation increase.

2.15 Share capital and equity

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities.

Flour Mills of Nigeria Plc

Annual Report for the year ended 31 March 2020

Notes to the Annual Report for the year ended 31 March 2020

2.15 Share capital and equity (continued)

The Company has only one class of shares; ordinary shares. Ordinary shares are classified as equity. When new shares are issued, they are recorded in share capital at their par value. The excess of the issue price over the par value is recorded in the share premium reserve. The use of the share premium account is governed by S.120(3) of CAMA. All ordinary shares rank equally with regard to the Company's residual assets. Holders of these shares are entitled to dividends as declared from time to time and are entitled to one vote per share at general meetings of the Company.

Incremental costs directly attributable to the issue of Ordinary shares are recognised as deduction from equity.

Fair value reserve comprises the cumulative net change in the fair value of available for sale financial assets until the assets are derecognised or impaired.

The Group's quasi equity investments are classified as equity instruments as the terms of the agreement does not contain an obligation to make principal or interest repayment except at the discretion of issuer. Discretionary payment of principal and interest on quasi equity investment are accounted for in equity as an equity transaction.

2.16 Deposit for imports

Foreign currencies applied to fund of letters of credit in respect of imported raw materials, spare parts and machinery are recognised as deposit for imports on the statement of financial position.

2.17 Employee benefits

Short-term employee benefits

Short-term employee benefits are expensed as the related service is provided. A liability is recognised for the amount expected to be paid as cash bonus if the Group has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

Defined contribution plans

The Group and Company operate a defined contribution based retirement benefit scheme for its staff, in accordance with the Pension Reform Act of 2014 with employee contributing 8% and the employer contributing 10% each of the employee's relevant emoluments (basic salaries, housing and transport allowances). Payments to defined contribution retirement benefit plans are recognised as an expense when employees have rendered the service entitling them to the contributions. Employees contributions are deducted through payroll.

Defined benefits

The Group and Company also operates a gratuity scheme for its qualified staff. Benefits are related to the employees' length of service and remuneration. The gratuity obligation is determined using the Projected Unit Credit Method, with actuarial valuations being carried out at the end of each reporting period by an independent actuary. All actuarial gains and losses are recognised immediately through other comprehensive income. Net interest is calculated by applying the discount rate at the beginning of the period to the net defined benefit liability. The Company's obligation in respect of the scheme is the amount of future benefits that employees have earned in return for their service in the current and prior periods.

The benefit is discounted to determine its present value. The discount rate is the yield at the reporting date on Federal Government of Nigeria issued bonds that have maturity dates approximate to the term of the company's defined benefits obligation. Defined benefit costs are categorised as follows:

- Service cost (including current service cost, past service cost, as well as gains and losses on curtailments and settlements)
- Net interest expense
- Remeasurement (actuarial gains and losses)

The service cost and net interest expense are charged to the profit or loss while the gains and loss due to remeasurement are charged to other comprehensive income.

Although the fund is not funded the Group ensures that adequate arrangements are in place to meet its obligations under the scheme.

Flour Mills of Nigeria Plc

Annual Report for the year ended 31 March 2020

Notes to the Annual Report for the year ended 31 March 2020

2.17 Employee benefits (continued)

Long service award

In addition, the Group operates long service award for its qualified staff. The benefits are graduated depending on the employees number of years in service to the Group. The Group's obligation in respect of the scheme is the amount of future benefits that employees have earned in return for their service in the current and prior periods. The benefit is discounted to determine its present value. The discount rate is the yield at the reporting date on Federal Government of Nigeria issued bonds that have maturity dates approximate to the term of the Group's defined benefits obligation. The obligation is determined by an independent actuary at each reporting period.

When the benefits of a plan are changed or when a plan is curtailed, the resulting change in benefit that relates to past service or the gain or loss on curtailment is recognised immediately in profit or loss. The Group recognises gains and losses on the settlement of a defined benefit plan when the settlement occurs. Gains or losses due to remeasurement of long service awards are recognised in profit or loss

Termination benefits

Termination benefits are expensed at the earlier of when the Group can no longer withdraw the offer of those benefits and when the Group recognises costs for a restructuring. If benefits are not expected to be settled wholly within 12 months of the reporting date, then they are discounted.

2.18 Provisions and contingencies

Provisions are recognised when:

- the Group has a present obligation as a result of a past event;
- it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation; and
- a reliable estimate can be made of the obligation.

The amount of a provision is the present value of the expenditure expected to be required to settle the obligation. The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cashflows (when the effect of the time value of money is material).

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognised as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

Restructuring

A restructuring provision is recognised when the Group has developed a detailed formal plan for the restructuring and has raised a valid expectation in those affected that it will carry out the restructuring by starting to implement the plan or announcing its main features to those affected by it. The measurement of a restructuring provision includes only the direct expenditures arising from the restructuring, which are those amounts that are both necessarily entailed by the restructuring and not associated with the ongoing activities of the entity. Future operating losses are not provided for.

Contingent liabilities

A contingent liability is a possible obligation that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the company, or a present obligation that arises from past events but is not recognised because it is not probable that an outflow of resources embodying economic benefits will be required to settle the obligation; or the amount of the obligation cannot be measured with sufficient reliability. Contingent liabilities are only disclosed and not recognised as liabilities in the statement of financial position. If the likelihood of an outflow of resources is remote, the possible obligation is neither a provision nor a contingent liability and no disclosure is made.

2.19 Government grants

Government grants that are receivable as compensation for expenses or losses already incurred or for the purpose of giving immediate financial support to the Group with no future related costs are recognised in profit or loss in the period in which they become receivable

The benefit of a government loan at a below-market rate of interest is treated as a government grant, measured as the difference between proceeds received and the fair value of the loan based on prevailing market interest rates.

Flour Mills of Nigeria Plc

Annual Report for the year ended 31 March 2020

Notes to the Annual Report for the year ended 31 March 2020

2.19 Government grants (continued)

Government grants are not recognised until there is reasonable assurance that the Group will comply with the conditions attaching to them and that the grants will be received.

Government grants are recognised in profit or loss on a systematic basis over the periods in which the Group recognises as expenses the related costs for which the grants are intended to compensate.

2.20 Investment income

Dividend income from investments is recognised when the shareholders' rights to receive payment have been established by approval of dividend at the annual general meeting of the investee (provided that it is probable that the economic benefits will flow to the Group and the amount of revenue can be measured reliably).

Interest income is recognised when it is probable that the economic benefits will flow to the Group and the amount of revenue can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount on initial recognition.

Rental income from letting property is recognised in the profit or loss on a straight-line basis over the term of the lease. Lease incentives granted are considered as an integral part of the total rental income and recognised over the term of the lease. Rental income from the ordinary business of the Group is recognised as revenue, while rental income from activities other than the ordinary business are recognised as other operating income.

2.21 Earnings per share

The Group presents basic and diluted earnings per share (EPS) data for its ordinary shares. Basic EPS is calculated by dividing the profit or loss attributable to ordinary shareholders of the Company by the weighted average number of ordinary shares outstanding during the period, adjusted for own shares held. Diluted EPS is determined by adjusting the profit or loss attributable to ordinary shareholders and the weighted average number of ordinary shares outstanding, adjusted for own shares held, for the effects of all dilutive potential ordinary shares.

2.22 Borrowing costs

Borrowing costs are interest and other costs that the Group incurs in connection with the borrowing of funds. These include interest expenses calculated using the effective interest rate method, finance charges in respect of finance leases and exchange differences arising from foreign currency borrowings. Where a range of debt instruments is used to borrow funds, or where the financing activities are coordinated centrally, a weighted average capitalisation rate is applied.

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale. The Group defines a qualifying asset as an asset that takes more than a year to prepare for its intended use.

Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation.

All other borrowing costs are recognised as an expense in the period in which they are incurred.

Flour Mills of Nigeria Plc

Annual Report for the year ended 31 March 2020

Notes to the Annual Report for the year ended 31 March 2020

2.23 Foreign currencies translations

Foreign currency transactions

Transactions in currencies other than the entity's functional currency (foreign currencies) are recognized at the rates of exchange prevailing on the dates of the transactions. At the end of each reporting period, monetary assets and liabilities that are denominated in foreign currencies are translated at the rates prevailing at that date. Non-monetary items that are measured based on historical cost in foreign currency are translated at the exchange rate at the date of the transaction. Non-monetary items that are measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined.

Exchange differences on monetary items are recognised in the profit or loss in the period in which they arise.

Exchange differences arising on the settlement of monetary items or on translating monetary items at rates different from those at which they were translated on initial recognition during the period or in previous annual report are recognised in profit or loss in the period in which they arise.

When a gain or loss on a non-monetary item is recognised to other comprehensive income and accumulated in equity, any exchange component of that gain or loss is recognised to other comprehensive income and accumulated in equity. When a gain or loss on a non-monetary item is recognised in profit or loss, any exchange component of that gain or loss is recognised in profit or loss.

Cash flows arising from transactions in a foreign currency are recorded in Naira by applying to the foreign currency amount the exchange rate between the Naira and the foreign currency at the date of the cash flow.

Exchange differences on foreign currency borrowings relating to assets under construction for future productive use, which are included in the cost of those assets are regarded as an adjustment to interest costs on those foreign currency borrowings.

2.24 Statement of cash flows

The Group applies the indirect method for preparation of the statement of cash flows. Changes in statement of financial position items that have not resulted in cash flows such as translation differences, fair value changes and other non-cash items have been adjusted for the purpose of preparing the statement. Dividends paid to ordinary shareholders are included in financing activities. Interest paid is also included in financing activities while finance and dividend income is included in investing activities.

2.25 Dividends

Dividends which remain unclaimed for a period exceeding twelve(12) years from the date of declaration and which are no longer actionable by shareholders in accordance with section 385 of the Companies and Allied Matters Act Cap C.20 Laws of the Federation of Nigeria, 2004 are written back to retained earnings.

2.26 Net Operating Gains/Losses

Net operating gains and losses is the result generated from the fees earned, rental income, government grants, fair value gains on derivatives, foreign exchange differences, profit or loss on disposal of property, plant and equipment, impairment of investment in subsidiary and other sundry income.

2.27 Cost of Sales

Cost of sales represents decreases in economic benefits during the accounting period that are directly related to revenue-generating activities of the Group. Cost of sales is recognized on an accrual bases regardless of the time of spending cash and measured at historical cost.

2.28 Prepayment

Prepayments are non-financial assets which result when payments are made in advance of the receipt of goods and services. They are recognised when the Company expects to receive future economic benefits equivalent to the value of the prepayments. The receipt or consumption of the services results in a reduction in the prepayment and a corresponding increase in expenses or assets for that reporting period.

Flour Mills of Nigeria Plc

Annual Report for the year ended 31 March 2020

Notes to the Annual Report for the year ended 31 March 2020

2.29 Other investments

Other investments are equity instruments of unrelated entities owned by the Group. The Group assesses the fair value of the instrument at the end of each reporting period. The Group and the Company has designated other investments as at fair value through other comprehensive income.

3 Significant judgements, assumptions and sources of estimation uncertainty

The preparation of financial statement in conformity with IFRS requires Directors, from time to time, to make judgements, estimates and assumptions that affect the application of policies and reported amounts of assets, liabilities, income and expenses.

The estimates and associated assumptions are based on experience and various other factors that are believed to be reasonable under the circumstances. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimates are revised if the revision affects only that period, or in the period of the the revision and future periods if the revision affects both current and future periods.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to estimates are recognised prospectively.

Use of Judgements

Information about judgements made in applying accounting policies that have the most significant effect on the amount recognised in the financial statement is included in the following notes;

Note (6) revenue recognition: whether revenue from services is recognised over time or at a point in time

Note (41) lease term; whether the Group is reasonably certain to exercise extension options

Note (16)- recognition of deferred tax assets: availability of future taxable profit against which deductible temporary difference and tax losses carried forward can be utilised;

Assumptions and estimation uncertainties

Information about assumptions and estimation uncertainties as at 31 March 2020 that have a significant risk of resulting in a material adjustment to the carrying amounts of costs and liabilities in the next financial year is included in the following notes

Note (6)- Revenue recognition; estimate of expected returns

Note (34) and (35)- recognition of defined benefit obligation: key actuarial assumptions;

Note (24) determining the fair value of biological assets on the basis of significant unobservable inputs;

Note (20) and (21)- impairment test of intangible assets and goodwill; key assumptions underlying recoverable amounts, including the recoverability of development costs;

Note(37) and (52)- recognition and measurement of provisions and contingencies; key assumptions about the likelihood and magnitude of an outflow of resources;

Note (27) measurement of ECL allowance for the receivables and contract assets; key assumptions in determining the weighted-average loss rate; and

Note (22)- acquisition of subsidiary; fair value of the consideration transferred (including contingent consideration) and fair value of the assets acquired and liabilities assumed measured on a provision basis.

The following are the areas of estimation uncertainties and critical judgements, that the Directors have made in the process of applying the Group's accounting policies and that have the most significant effect on the amounts recognised in the consolidated financial statements:

Flour Mills of Nigeria Plc

Annual Report for the year ended 31 March 2020

Notes to the Annual Report for the year ended 31 March 2020

3. Significant judgements, assumptions and sources of estimation uncertainty (continued)

Biological assets

Fair value of biological assets is measured with reference to the estimated price in an active market at the point of harvest adjusted for its present location and stage of maturity/condition. Judgement is involved in the determination of the adjustment required to the market price to reflect the stage of maturity/condition of the biological assets.

Allowance for credit losses

The Company periodically assesses its trade and other receivables for probability of credit losses. Management considers several factors including past credit record, current financial position and credibility of customers. Judgment is exercised in determining the allowances made for credit losses.

Impairment allowance are made for receivables that have been outstanding for 365 days, in respect of which there is no firm commitment to pay by the customer.

Furthermore all balances are reviewed for evidence of impairment and provided against once recovery is doubtful. These assessments are subjective and involve a significant element of judgment by management on the ultimate recoverability of amounts receivable.

Property, plant and equipment

Property, plant and equipment represent a significant proportion of the asset base of the Group, accounting for about 50% of the Group's total assets. Therefore the estimates and assumptions made to determine their carrying value and related depreciation are critical to the Group's financial position and performance.

The charge in respect of periodic depreciation is derived after determining an estimate of an asset's expected useful life and the expected residual value at the end of its life. Increasing an asset's expected life or its residual value would result in the reduced depreciation charge in profit or loss.

The Group reviews the estimated useful lives of property, plant and equipment at the end of each reporting period. There were no changes in the useful lives of Property, plant and equipment in the current year.

Contingencies

Judgements and assumptions are made about the likelihood and magnitude of an outflow of resources with respect to ongoing litigation and claims and regulatory audits.

Valuation of financial liabilities

As at the end of the reporting period, the Group was granted some government assisted loans at below market rates. In accordance with IAS 20, the government grant which is the difference between the proceeds of the loans and their fair value should be accounted for. Based on IAS 39, all financial liabilities should be initially recognized at fair value. In computing the fair value of these loans, the imputed interest rate used in discounting the cash flows associated with the loans is based on management judgement of best estimate of its borrowing cost at the time the loans were granted.

Provision for gratuity

The Company operates an unfunded defined benefit scheme which entitles staff who put in a minimum qualifying working period of five years to gratuity upon leaving the employment of the Company. IAS 19 requires the application of the Projected Unit Credit Method for actuarial valuations. Actuarial measurements involve the making of several demographic projections regarding mortality, rates of employee turnover etc. and financial projections in the area of future salaries and benefit levels, discount rate, inflation etc.

Provision for long service award

A provision for Long term service award is granted at first to employees that have spent a minimum of ten years in service and for every multiple five years an employee remains in service. IAS 19 requires the application of the Projected Unit Credit Method for actuarial valuations. Actuarial measurements involve the making of several demographic projections regarding mortality, rates of employee turnover etc. and financial projections in the area of future salaries and benefit levels, discount rate, inflation etc.

Flour Mills of Nigeria Plc

Annual Report for the year ended 31 March 2020

Notes to the Annual Report for the year ended 31 March 2020

3. Significant judgements, assumptions and sources of estimation uncertainty (continued)

Taxation

The Group's tax charge on ordinary activities is the sum of the total current and deferred tax charges. The calculation of the Group's total tax charge necessarily involves a degree of estimation and judgment in respect of certain items whose treatment cannot be finally determined until resolution has been reached with the relevant tax authority.

Impairment of Goodwill

Determining whether goodwill is impaired requires an estimation of the recoverable amount of the cash generating units to which goodwill has been allocated. The value in use calculations requires directors to estimate the future cashflows expected to arise from the cash generating unit and use a suitable discount rate to calculate the present value. The determination of the expected future cashflows requires judgement to be made by management. Where the actual future cashflows are less than expected, an impairment loss may arise.

Discounted Operations

A discontinued operation is a component of the Company's business, the operations and cash flows of which can be clearly distinguished from the rest of the Group and which:

- represents a separate major line of business or geographical area operations
- is part of a single co-ordinated plan to dispose of a separate major line of business or geographical area of operations; or
- is a subsidiary acquired exclusively with a view to resale

Classification as a discontinued operation occurs at the earlier of disposal or when the operation meets the criteria to be classified as held for sale, if earlier. When an operation is classified as a discontinued operation, the comparative statement of profit or loss is represented as if the operation had been discontinued from the start of the comparative year.

Measurement of fair value

A number of the Group's accounting policies and disclosures require the determination of fair value, for both financial and non-financial assets and liabilities. When applicable, further information about the assumptions made in determining fair values is disclosed in the notes specific to that asset or liability. Significant valuation issues are reported to the Audit Committee.

When measuring the fair value of an asset or a liability, the Group uses market observable data as far as possible. Fair values are categorised into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

In some cases, if the inputs used to measure the fair value of an asset or a liability is categorised in different levels of the fair value hierarchy, then the fair value measurement is categorized in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement.

The Group/Company recognizes transfers between levels of the fair value hierarchy at the end of the reporting period during which the change has occurred.

Further information about the basis of determination of fair values are as follows:

i) Property, plant and equipment

The fair value of property, plant and equipment recognized as a result of a business combination is based on the quoted market prices for similar items when available and depreciated replacement cost based on independent valuation when appropriate.

ii) Intangible assets

The fair value of intangible assets acquired in a business combination is based on the discounted cash flows expected to be derived from the use and eventual sale of the assets.

Flour Mills of Nigeria Plc

Annual Report for the year ended 31 March 2020

Notes to the Annual Report for the year ended 31 March 2020

3. Significant judgements, assumptions and sources of estimation uncertainty (continued)

iii) Inventories

The fair value of inventories acquired in a business combination is determined based on the estimated selling price in the ordinary course of business less the estimated costs of completion and sale, and a reasonable profit margin based on the effort required to complete and sell the inventories

iv) Trade and other receivables

The fair value of trade and other receivables is estimated as the present value of future cash flows, discounted at the market rate of interest at the reporting date. This fair value is determined for disclosure purposes. For short term trade receivables, no disclosure of fair value is presented when the carrying amount is a reasonable approximation of fair value due to the insignificant impact of discounting.

v) Non-derivative financial instruments

Fair value, which is determined for disclosure purposes, is calculated based on the present value of future principal and interest cash flows, discounted at the market rate of interest at the reporting date.

Further information about the assumptions made in measuring fair value is included in the following notes:

- Biological asset (note 24)
- Financial instruments - Financial risk management and fair values (Note 45).

Financial instruments comprising financial assets and financial liabilities are recognised in the statement of financial position when the Group and Company become a party to the contractual provisions of the instrument. The Group and Company have adopted IFRS 9 Financial Instruments from 1 January 2018. As permitted by the standard, comparative figures have not been restated and these are presented in accordance with the Group's and Company's previous policies. Both the new and old accounting policies are described in note

Operating profit

Operating profit is the result generated from the continuing principal revenue-producing activities of the Group as well as other income and expenses related to operating activities. Operating profit excludes net finance costs, share of profit of equity-accounted investees and income taxes.

Flour Mills of Nigeria Plc

Annual Report for the year ended 31 March 2020

Notes to the Annual Report for the year ended 31 March 2020

4. New Standards and Interpretations

4.1 Standards and interpretations effective and adopted in the current year

In line with IFRS, entities are required to disclose among others, known or a reasonable estimable information relevant to assessing the possible impact(s) of those Standards and Interpretations that have been issued but not yet effective on the financial statements in the year of initial application.

In the current year, the Group has adopted the following standards and interpretations that are effective for the current financial year

The effective interpretations and standards that have been considered for financial year ended 31 March 2020 are listed below:

(a) IFRIC 23 Uncertainty over Income Tax Treatments

(b) IFRS 16 Leases

Other standards effective in the year which had no material impact on the financial statement include;

c) Prepayment Features with Negative Compensation (Amendments to IFRS 9)

(d) Long-term interests in Associates and Joint Ventures (Amendments to IAS 28)

(e) Plan Amendment, Curtailment or Settlement (Amendment to IAS 19)

(f) Annual Improvements to IFRS Standards 2015/2017 Cycle (various standards)

Flour Mills of Nigeria Plc

Annual Report for the year ended 31 March 2020

Notes to the Annual Report for the year ended 31 March 2020

4. New Standards and Interpretations (continued)

Uncertainty over Income Tax Treatments (IFRIC 23)

The interpretation clarifies how to apply the recognition and measurement requirements in IAS 12 when there is uncertainty over income tax treatments. Specifically, if it is probable that the tax authorities will accept the uncertain tax treatment, then all tax related items are measured according to the planned tax treatment. If it is not probable that the tax authorities will accept the uncertain tax treatment, then the tax related items are measured on the basis of probabilities to reflect the uncertainty. Changes in facts and circumstances are required to be treated as changes in estimates and applied prospectively.

The Group has adopted the requirements of IFRIC 23 effective 1 April 2019 and noted no significant impact on its financial statements.

Flour Mills of Nigeria Plc

Annual Report for the year ended 31 March 2020

Notes to the Annual Report for the year ended 31 March 2020

4. New Standards and Interpretations (continued)

4.2 Standards and interpretations not yet effective

The Group has chosen not to early adopt the following standards and interpretations, which have been published and are mandatory for the Group's accounting periods beginning on or after April 1, 2020 or later periods:

A number of new standards and amendments to standards and interpretations are effective for annual periods beginning after 31 December 2019, and have not been applied in preparing these financial statements. Management is yet to assess the effect of the following standards on the financial statements of the Company. These include:

Definition of Material – Amendments to IAS 1 and IAS 8 (1 January 2020)

In October 2018, the IASB issued amendments to IAS 1 Presentation of Financial Statements and IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors to align the definition of 'material' across the standards and to clarify certain aspects of the definition. The new definition states that, 'Information is material if omitting, misstating or obscuring it could reasonably be expected to influence decisions that the primary users of general purpose financial statements make on the basis of those financial statements, which provide financial information about a specific reporting entity.' The amendments to the definition of material is not expected to have a significant impact on the Company's financial statements.

Conceptual framework for financial reporting - Revised (effective date - 1 Jan 2020)

These amendments were issued in March 2018. Included in the revised conceptual framework are revised definitions of an asset and a liability as well as new guidance on measurement and derecognition, presentation and disclosure. The amendments focused on areas not yet covered and areas that had shortcomings.

There are no other IFRSs or IFRIC interpretations that are not yet effective that would be expected to have a material impact on the Group and the Company.

5. Changes in significant accounting policies

The financial statement have been prepared in accordance with International Financial Reporting Standards on a basis consistent with the prior year except for the adoption of the following new or revised standards.

Flour Mills of Nigeria Plc

Annual Report for the year ended 31 March 2020

Notes to the Annual Report for the year ended 31 March 2020

5. Changes in significant accounting policies (continued)

IFRS 16 - Leases

The Group and Company initially applied IFRS 16 Leases from 1 April 2019. A number of other new standards are also effective from 1 April 2019 but they do not have a material impact on the Group's financial statements. The Group and Company applied IFRS 16 using the modified retrospective approach, and applied the practical expedient of not adjusting the opening balance of retained earnings. Accordingly, the comparative information presented for 2019 is not restated – i.e. it is presented, as previously reported, under IAS 17 and related interpretations. The details of the changes in accounting policies are disclosed below. Additionally, the disclosure requirements in IFRS 16 have not generally been applied to comparative information.

On transition to IFRS 16, the Group and the Company elected to apply the practical expedient to grandfather the assessment of which transactions are leases. The Group and the Company applied IFRS 16 only to contracts that were previously identified as leases. Contracts that were not identified as leases under IAS 17 and IFRIC 4 were not reassessed for whether there is a lease under IFRS 16. Therefore, the definition of a lease under IFRS 16 was applied only to contracts entered into or changed on or after 1 April 2019.

As a lessee, the Group and the Company leases silos, warehouses, office buildings, flats and apartments. The Group previously classified leases as operating or finance leases based on its assessment of whether the lease transferred significantly all of the risks and rewards incidental to ownership of the underlying asset to the Group and Company. Under IFRS 16, the Group recognises right-of-use assets and lease liabilities for most of these leases – i.e. these leases are on-balance sheet. At commencement or on modification of a contract that contains a lease component, the Group allocates the consideration in the contract to each lease component on the basis of its relative stand-alone price. However, for leases of property the Group and the Company has elected not to separate non-lease components and account for the lease and associated non-lease components as a single lease component.

Impact on financial statements

Impact on transition

On transition to IFRS 16, the Group recognised additional right-of-use assets, and additional lease liabilities, no retained earnings impacts was recognised. The impact on transition is summarised below

	Group 1 April 2019	Company 1 April 2019
In Thousands of Naira		
Right of use assets	16,267,672	4,885,286
Deferred tax asset	-	-
Lease liabilities	(12,784,790)	(2,589,094)
Prepayments	(3,482,882)	(2,296,192)
Retained earnings	-	-

When measuring lease liabilities for leases that were classified as operating leases, the Group discounted lease payments using its incremental borrowing rate at 1 April 2019. The weighted average incremental borrowing rate applied on foreign denominated and Naira denominated lease payments are 7.7 % and 15.02 % respectively.

	Group 1 April 2019	Company 1 April 2019
In thousands of Naira		
Operating lease commitments at 31 March 2019	18,146,143	1,330,000

Insurance	550,767	387,468	228,332	142,775
Other production expenses	7,063,969	5,019,889	2,055,689	1,417,292
*Agro allied (Fertilizer Division)	-	-	-	(16,878,116)
	507,987,179	474,057,010	354,952,741	337,073,874

*In prior year, the Company discontinued the operations of its fertilizer division and transferred its operations, including assets and liabilities, to Golden Fertilizer Company Limited. See further details in Note 52.

8. Segment information

Information reported to the chief operating decision makers (Board of Directors) for the purposes of resource allocation and assessment of segment performance focuses on types of goods or services delivered or provided.

Basis of Segmentation

The Group has the following four strategic divisions, which are its reportable segments. These divisions offer different products and services, and are managed separately because they require different operational and marketing strategies.

Inter-segment pricing is determined on an arm's length basis.

The following summary describes the operations of each reportable segment:

Flour Mills of Nigeria Plc

Annual Report for the year ended 31 March 2020

Notes to the Annual Report for the year ended 31 March 2020

8. Segment information (continued)

Food	Milling and sales of flour and production and sales of pasta, snacks and noodles.
Agro Allied	Farming of maize, cassava, soya, sugar cane and oil palm and production and sales of fertilizer, edible oils and livestock feeds.
Support Services	Manufacturing and marketing of laminated woven polypropylene sacks and flexible packaging materials. Port terminal operations, customs clearing and forwarding, shipping, haulage services and leasing of investment property.
Sugar	Cultivation and processing of sugarcane, refining and selling of sugar and sale of by-products from sugar refining.

The Board of Directors of Flour Mills of Nigeria Plc reviews the internal management reports of each segment on a periodic basis.

There are varying levels of integration between the Food and the Agro allied segments and the Sugar and Services segments. This integration includes transfer and sale of raw and packaging materials and shared distribution services respectively.

All non-current asset of the Group are domiciled in Nigeria.

Group

Segment revenue and profit or loss

The following is an analysis of the Group's revenue and results from continuing operations by reportable segment:

31 March 2020

Group

	Revenue N '000	Cost of sales N '000	Gross profit N '000
Food	358,353,952	322,268,651	36,085,301

Elimination of Inter-segment revenue	(92,399,351)	-	(76,292,563)	-
Elimination of Inter-segment profit/loss	-	(12,044,693)	-	(12,258,712)
	573,774,356	17,496,815	527,404,567	10,174,275

Revenue from customers domiciled in Nigeria amounted to N569.4 billion (2019: N520.2 billion), while revenue from foreign customers (export revenue) amounted to N4.3 billion (2019: N7.2 billion).

The accounting policies of the reportable segments are the same as the Group's accounting policies described in note 2. Segment profit represents the profit earned by each segment without allocation of income tax expense. This is the measure reported to the chief operating decision maker for the purposes of resource allocation and assessment of segment performance.

Payment during the year				
Cash	(2,562,378)	(2,583,747)	(336,250)	(1,116,414)
Withholding tax utilised	(310,841)	(761,506)	(166,260)	(58,777)
Current tax payable	5,531,160	4,104,046	2,566,482	775,960

Minimum Tax

Minimum tax has been computed for the Group subsidiaries with no assessable profits year end. During the year, the Group applied the provisions of Finance Act, which required minimum tax to be computed based on 0.5% of turnover and this amounted to N243 million. Minimum tax in prior year was computed based on the Company Income Tax Act (CITA) and this amounted to N226 million.

Flour Mills of Nigeria Plc

Annual Report for the year ended 31 March 2020

Notes to the Annual Report for the year ended 31 March 2020

	Group		Company	
	31-Mar-20 N. '000	31-Mar-19 N. '000	31-Mar-20 N. '000	31-Mar-19 N. '000
15. Taxation (continued)				
Reconciliation of effective tax rate				
Profit before tax on continuing operations (A)	17,253,593	9,948,659	17,537,685	18,536,249
Tax at the statutory corporation tax rate of 30% (2019:30%)	5,176,078	2,984,598	5,261,306	5,560,875

Effect of expenses that are not deductible in determining taxable profit	1,152,260	5,414,842	944,489	888,887
Effect of investment allowance and other incentives	(430,254)	(491,018)	(301,079)	(388,526)
Education tax at 2% of assessable profits	1,016,142	1,245,918	590,651	420,735
Current year losses for which no deferred tax was recognised	1,388,552	-	-	-
Derecognition of previously recognised deferred tax	1,068,881	-	-	-
Effect of previously unrecognised deferred tax now recognised	-	(2,368,765)	-	-
(Over) or under provision in prior year	(699,359)	495,782	(273,451)	260,864
Effect of tax on dividend income	-	-	-	166,260
Change in recognised deductible temporary differences	-	(1,236,748)	-	(1,983,859)
Effect of multiple tax due to commencement rule (Effect of the transition to Finance Act on current year deferred tax)	(1,461,691)	4,037,054	-	-
Income tax expense recognized in profit or loss (relating to continuing operations)	5,876,850	5,948,513	4,955,114	986,742
Income tax expense recognized in profit or loss (B)	5,876,850	5,948,513	4,955,114	986,742
Effective tax rate (B/A)	34 %	60 %	28 %	5 %

The Finance Act 2019 became effective on 13 January 2020 and introduced significant changes to some sections of the Companies Income Tax Act (CIT). These changes have been applied in determining the estimated income tax charge for the year in line with the provisions of the Finance Act and the clarification circulars issued by the Federal Inland Revenue Service (FIRS).

16. Deferred tax

Analysis of deferred tax balances

Deferred tax asset	3,578,421	3,963,819	-	-
Deferred tax liability	(11,848,855)	(10,587,507)	(10,665,100)	(8,150,526)
Net deferred tax liability	(8,270,434)	(6,623,688)	(10,665,100)	(8,150,526)

The Group has unrecognised capital allowance and unutilised tax losses amounting to N3.6 billion and 17.5 billion (2019:N8.6 billion and N6.5 billion respectively). No deferred tax asset has been recognised in respect of these amounts due to the unpredictability of the amount and timing of future taxable profit against which they would be utilised. The Group would re-assess the timing and availability of future taxable profit against which the asset can be utilised in subsequent years. Previously unrecognised deferred tax assets were recognised on the basis of probability of future taxable profits based on the Group's improved business outlook and forecast of growth. The capital allowances and tax losses can be carried forward indefinitely.

Flour Mills of Nigeria Plc

Annual Report for the year ended 31 March 2020

Notes to the Annual Report for the year ended 31 March 2020

16. Deferred tax (continued)

Deferred tax assets and liabilities

Flour Mills of Nigeria Plc

Annual Report for the year ended 31 March 2020

Notes to the Annual Report for the year ended 31 March 2020

17. Earnings per share (continued)

Diluted earnings per share

In the determination of diluted earnings per share, profit or loss attributable to the equity holders of the Company and the weighted average number of ordinary shares are adjusted for the effects of all dilutive potential ordinary shares.

Where there is a discontinued operation, diluted earnings per share is determined for both continuing and discontinued operations.

Measurement of fair value

The fair value of the Group's and Company's investment property as at 31 March 2020 is N7.1 billion (31 March 2019: N5.1 billion) N579.8 million (2019: N558.6 million) respectively. The fair value of the Group's investment property has been arrived at on the basis of valuation carried out on the respective date by Messrs. Godwin Kalu & Co (FRC registration number: FRC/2012/NIESV/00000000470), and Messrs Jide Taiwo & Co Estate Surveyors & Valuers (FRC registration number: FRC/2012/000000000254). Messrs. Godwin Kalu & Co and Messrs Jide Taiwo & Co are members of the Nigeria Institute of Estate Surveyors and Valuers and are not related to the Group. The fair value was determined based on the market comparable approach that reflects the recent transaction price of similar properties within a reasonable time frame.

There has been no change in the valuation technique during the year.

	Group		Company	
	31-Mar-20 N. '000	31-Mar-19 N. '000	31-Mar-20 N. '000	31-Mar-19 N. '000
Fair value Level 3				
Abuja residential property	450,000	400,456	450,000	400,456

19. Investment property (continued)

Details of valuation

Valuation techniques	Significant unobservable inputs	Inter-relationship between key unobservable inputs and fair value measurement
The valuation has been done using the market comparison approach. The fair values are based on market price of similar properties adjusted for relevant estimated costs of construction. This is based on the economic principle that a buyer will pay no more for an asset than what it will cost the buyer to own an equivalent asset of equal utility either through purchase or outright construction.	Adjusted cost of construction per floor area N2.25 million per square meter (2019: N1.63 million per square meter)	:The estimated fair value will increase/ (decrease) if: - estimated adjusted cost of construction per square meter were higher (lower)
The cost of construction is determined by reference to the current construction rate of a similar property to the gross floor area including other associated costs which is further depreciated to reflect present physical conditions, functional and economic obsolescence on the property before including the value of the bare site at the date of the valuation.	Adjusted forced sale cost of construction per floor area N1.65 million per square meter (2019: N1.14 million per square meter)	The estimated fair value will increase/ (decrease) if: - estimated adjusted forced sale cost of construction per square meter were higher (lower)

Company	31-Mar-20			31-Mar-19		
	Cost	Accumulated impairment	Carrying value	Cost	Accumulated impairment	Carrying value
Goodwill	1,876,816	-	1,876,816	1,876,816	-	1,876,816

	Group	
	31-Mar-20 N. '000	31-Mar-19 N. '000
Goodwill on acquisition of Premium Edible Oil Products Limited (ROM Oil Mills Company Limited)	1,351,067	1,351,067
Goodwill on acquisition of Premium Cassava Products Limited (Thai Farms Limited)	920,139	920,139
Goodwill on acquisition of Quilvest through New Horizon Flour Mills Limited	1,876,816	1,876,816
	4,148,022	4,148,022

Goodwill has been assessed for impairment as part of the annual mandatory impairment testing in line with the requirements of the International Financial Reporting Standards. Goodwill was apportioned to identified Cash Generating Units (CGUs) expected to benefit from the respective business combinations on the basis of management expectation of the benefit to be derived from their synergies.

As at 31 March 2020, the adjusted carrying values of the assets of the CGUs to which the Goodwill was allocated were lower than their recoverable amounts. As a result, no impairment loss on Goodwill has been recognized (31 March 2019; Nil).

Goodwill has been allocated for impairment test purposes to the following cash-generating units:

- Flour Mills of Nigeria Plc.
- Premier Feed Mills Company Limited
- Nigerian Eagle Flour Mills Limited

The carrying amount of goodwill was allocated to the cash generating units as follows:

	PEOPL N.'000	PCPL N.'000	Quilvest N.'000	Total N.'000
Flour Mills of Nigeria Plc	769,754	801,153	1,876,816	3,447,723
Premier Feed Mills Company Limited	581,313	-	-	581,313
Nigerian Eagle Flour Mills Limited	-	118,986	-	118,986
	1,351,067	920,139	1,876,816	4,148,022

Cash Generating Units

For identified CGUs, the recoverable amount of the cash generating units was determined based on a value in use calculation which uses cash flow projections based on five (5) year projections of current year free cash flows from operations and a weighted average cost of capital (WACC) of 13.71% - 17.26% (2019: 13.71%- 17.26% per annum).

Key forecast assumptions

The key inputs and assumptions used in the value in use calculations for the cash generating units are as follows.

Flour Mills of Nigeria Plc

Annual Report for the year ended 31 March 2020

Notes to the Annual Report for the year ended 31 March 2020

21. Goodwill (continued)

- Discount rate (WACC): 13.71%-17.26% (2019: 12.8% - 17.26%)
- Net cash flow: The Net cash flow is based on 5-year forecast using 2020 as the base year.
- Terminal growth rate of 3%-7%.
- Inflation rate: Inflation rate is based on forecast consumer price indices during the period for the country. An inflation rate of 11.5% has been applied for the current year (2019: 11%). The value assigned to the key assumption is consistent with external sources of information.

The discount rate was based on computed WACC using the Capital Asset Pricing Model (CAPM). The net cash flows were then discounted using this rate to estimate their present values inclusive of a terminal growth value discounted to its present value thereafter. The terminal growth rate was determined based on the average Gross Domestic Product (GDP) growth rate of Nigeria for the past three (3) Decades.

Revenue growth was projected taking into account the average growth levels experienced over the past five (5) years and the estimated sales volume and price growth for the next five years. It was assumed that sales prices would grow at a constant margin above forecast inflation over the next five years.

The estimated recoverable amounts of all CGU's exceeded their carrying amount in the period under review (2019: same). Management has identified that a reasonably possible change in one (1) key assumption, the discount rate of 13.7% - 17.26% utilized in the period under review could cause the carrying amount to exceed the recoverable amount. The following shows the amount in percentages by which this key assumption would need to change per CGU for the estimated recoverable amount to equal the carrying amount:

FMN Company (20%), Nigerian Eagle Flour Mills(21%), Premier Flour Mills(16%).

In the prior period, management had assessed that any reasonably possible change in the key assumptions on which the recoverable amount is based would not cause the aggregate carrying amount to exceed the aggregate recoverable amount of each CGU.

The shareholdings in the subsidiaries above represents the Company's voting rights in the subsidiaries.

* These are dormant companies. The share capital for these subsidiaries have not been issued or paid up by the Company, hence no investment has been recorded as at 31 March 2020.

Flour Mills of Nigeria Plc

Annual Report for the year ended 31 March 2020

Notes to the Annual Report for the year ended 31 March 2020

22. Investment in subsidiaries (continued)

* Golden Penny Power Limited and Iganmu Power Company Limited were incorporated to carry out independent power projects, while Premier Poultry processors limited and Premier Chicks limited were incorporated for livestock farming and processing.

The entities where the Company has no share holding are indirect subsidiaries of the Company.

The place of business of the subsidiaries is Nigeria.

Flour Mills of Nigeria Plc

Annual Report for the year ended 31 March 2020

Notes to the Annual Report for the year ended 31 March 2020

22. Investment in subsidiaries (continued)

	Group		Company	
	31-Mar-20 N. '000	31-Mar-19 N. '000	31-Mar-20 N. '000	31-Mar-19 N. '000
(c) Movement in investment in subsidiaries				
At 1 April	-	-	44,005,134	35,280,134
Additions in the year	-	-	-	8,785,000
Loan receivable converted to equity	-	-	661,500	-
Impairment recognised	-	-	-	(60,000)
At 31 March	-	-	44,666,634	44,005,134

During the year, investments in subsidiaries were assessed for impairment considering the future cashflows and net assets of each subsidiary. Impairment indicators were identified relating to the carrying value of the Company's investment in subsidiaries. For the purpose of impairment testing, the subsidiaries identified for impairment testing have been identified as a cash generating unit (CGU).

The recoverable amounts of the identified subsidiaries have been determined on a value-in-use basis.

The key inputs and assumptions used in the value in use calculations for the cash generating units are as follows.

- Discount rate (WACC): 13.71%-17.26% (2019: 12.8%-17.26%).
- Net cash flow: The Net cash flow is based on 5-year forecast using 2020 as the base year.
- Terminal growth rate of 3-7%
- Inflation rate: Inflation rate is based on forecast consumer price indices during the period for the country. An inflation rate of 11.5% has been applied for the current year (2019: 11%). The value assigned to the key assumption is consistent with external sources of information.

The discount rate was based on computed WACC using the Capital Asset Pricing Model (CAPM). The net cash flows were then discounted using this rate to estimate their present values inclusive of a terminal growth value discounted to its present value thereafter. The terminal growth rate was determined based on the average Gross Domestic Product (GDP) growth rate of Nigeria adjusted for inflation.

Revenue growth was projected taking into account the average growth levels experienced over the past five (5) years and the estimated sales volume and price growth for the next five years. It was assumed that sales prices would grow at a constant margin above forecast inflation over the next five years.

23. Other Investments (continued)

The Group's investment in Transnational Corporation Plc was valued using the market price of N0.66 per share (2019: N1.21) as at year end which resulted in fair value decrease of N18.70 million (2019: fair value decrease of N21.76 million). The fair value changes have been recognised in other comprehensive income with no income tax impact. The valuations have been categorised as Level 1 in the fair value hierarchy as there are no unobservable input to the valuation. The valuation was done on the same basis as in prior year and there has been no transfers between levels during the year.

The Group designated the equity securities at FVOCI because the equity securities represent investments that the Group intends to hold for the long term for strategic purposes.

Livestock relates to poultry used for poultry eggs production at Best Chickens Limited and are stated at fair value less estimated point-of-sale costs, with any resultant gain or loss recognised in the profit or loss. Point-of-sale costs include all costs that will be necessary to sell the assets. The fair value of livestock is determined based on valuations using the market prices of livestock of similar age, breed and generic merit.

Oil palm refers to growing fresh fruit bunches at Agri Palm Limited and are stated at fair value less cost-to-sell with any resultant gain or loss recognised in profit or loss. Selling costs include all costs that would be necessary to sell the fresh fruit bunches (including cost of harvest). The fair value is determined based on valuations using the market prices of fresh fruit bunches per tonne of similar weight and quality. Oil Palm trees are classified as bearer plants (See Note 18).

Cassava is cultivated at Agro Allied Syrups Limited and Kaboji Farms Limited and the harvested cassava tubers are used for starch extraction and production of high quality cassava flour. They are stated at fair value less estimated cost-to-sell. Cost-to-sell include costs that would be necessary to sell the cassava tubers (including the cost of harvest). Fair value is determined based on valuation using market prices per tonne of cassava tubers of similar weight and quality, adjusted for stage of maturity.

Growing sugarcane refers to sugarcane plants at the plantation owned by Sunti Golden Sugar Estates Limited. The initial sugarcane suckers has a cane-production life of seven years (See Note 18). The cost of the suckers, the related land preparation cost and other directly associated cost such as those of fertilizer have been capitalised as bearer plants and are being depreciated over seven years. The canes which are harvested from the suckers annually for sugar milling are classified as biological assets. The biological assets are carried at fair value less estimated cost to sell. The fair value is based on market prices of sugarcane per tonne and stage to maturity.

Flour Mills of Nigeria Plc

Annual Report for the year ended 31 March 2020

Notes to the Annual Report for the year ended 31 March 2020

24. Biological assets (continued)

Methods and assumptions used in determining fair value

Fair value is determined using market-based evidence by appraisal. Valuation of biological assets is carried out at sufficient regularity to identify any material movement and any material differences are adjusted accordingly to ensure that the carrying value of the assets does not differ materially from the fair values determined as at the reporting date.

Measurement of fair values

Fair value hierarchy

The fair value measurement for the oil palm, livestock, fresh fruit bunch, the sugarcane and cassava have been categorised as Level 2 fair values based on observable market sales data.

The following table shows the valuation techniques used in measuring fair values as well as the valuation variables used:

Type	Valuation techniques	Valuation variables	Inter-relationship between key valuation variables and fair value measurement
Oil palm	Market comparism technique: The fair values are based on market price per tonne of similar palm fruit bunches adjusted for age of maturity.	<p>Estimated plantation size 4,342 hectares (2019: 4,342)</p> <p>Estimated market price per tonne - N35,000 (2019: N35,000)</p> <p>Number of trees - 195,753 (2019: 277,267).</p> <p>Estimated yield per tree -4 bunches per year (2019: 5).</p> <p>Estimated cost-to-sell per bunch - N120 (2019: N105).</p>	<p>The estimated fair value would increase/(decrease) if:</p> <p>a. the estimated price per tonne of fresh fruit bunch were higher/(lower).</p> <p>b. If the estimated yield per tree were higher/(lower).</p> <p>c. If the estimated cost to sell were lower/(higher)</p>

Flour Mills of Nigeria Plc

Annual Report for the year ended 31 March 2020

Notes to the Annual Report for the year ended 31 March 2020

24. Biological assets (continued)

Livestock	Market comparism technique: The fair values are based on market price of livestock of similar age, weight and breed.	Estimated number of birds as at 2020; . 21,092 (2019: 50,400). Average age ranges between 5 and 70 weeks. Average price per bird is N1,300 (2019: N1,200).	The estimated fair value would increase/(decrease) if: a. the estimated price per birds were higher/(lower) b. the estimated number of birds were higher/ (lower)
Cassava	Market comparism technique: The fair values are based on market price per tonne of cassava tubers of similar quality.	Estimated hectares of cultivated land in the year was 798.48 hectares (2019:199.34). Also the estimated yeild per hecter was 16.53 tonnes (2019:15.80). The estimated market price N9,957 per metric tonne (2019: N8,372 per metric tonne).	The estimated fair value would increase/(decrease) if: a. the estimated price per tonne were higher/ (lower) b. If the estimated yield per hectare were higher/(lower)
Sugarcane	Market comparison technique: The fair values are based on market price of similar cane sugar per tonne adjusted for estimated cost to sell and discounted for stage of maturity.	EsEstimated plantation size 2,490 hectares (2019: 2,192 hectares) Estimated market price: N9,060 per metric tonnes (2019: N8,610 per metric tonne) Estimated yield per hectare: 60 metric tonnes (2019: 60 metric tonne).	The estimated fair value would increase/ decrease if: (a) Price per metric tonne were higher/ (lower) (b) Estimated yield per hectre were higher/ (lower).

Flour Mills of Nigeria Plc

Annual Report for the year ended 31 March 2020

Notes to the Annual Report for the year ended 31 March 2020

24. Biological assets (continued)

Risk management strategy related to agricultural activities

The Group is exposed to the following risks relating to its biological assets:

a Regulatory and environmental risks

The Group is subject to laws and regulations in the states in which it operates. The Group has established environmental policies and procedures aimed at compliance with local environmental and other laws.

b Supply, demand and yield risks

The Group is exposed to risks arising from fluctuations in the prices of agricultural produce, birds and seedlings for cultivation as well as yield volumes. When possible, the Group manages these risks by aligning its harvest volume to market supply and demand. Management performs regular industry trend analyses for projected harvest volumes and pricing. The Group manages yield volume risks by employing latest technology and sourcing for optimally viable seedlings.

c Climate, disease and other risks

The Group's biological assets are exposed to the risks of damage from climatic conditions, diseases, forest fires and other natural forces. The Group has processes in place aimed at monitoring and mitigating those risks, including insurance, regular health inspections for the poultry, poultry vaccinations, use of environmentally friendly pesticides for the crops and leveraging on industry pest and disease surveys as well as other agricultural best practices.

25. Long term loan receivables (continued)

Credit quality on long term receivables

The Company granted intercompany loans with a carrying amount of N48.86 billion as at 31 March 2020 (2019: N33.6 billion) to related parties within the Group. The loan is receivable in tranches within seven years, with the possibility of early refund (partial; or whole) with 30 days notice, without penalty payments and the loans are unsecured. The Company and the Group are faced with the risk that there might be a shortfall in the repayment of these receivables. Adequate agreements are put in place as well as ensuring that the business activities of these entities are monitored closely on a monthly basis and interest are charged based on the weighted average cost of Group borrowing facilities.

Movement in Long term receivables

	Group		Company	
	31-Mar-20 N. '000	31-Mar-19 N. '000	31-Mar-20 N. '000	31-Mar-19 N. '000

Total trade and other receivables	25,731,446	26,085,312	28,471,323	50,322,189

* Sundry debtors relate majorly to Group and Company's withholding tax of N5.8 billion and N4.2 billion (2019:N4.6 billion and N3.3 billion) respectively, interest receivable on initial deposit made for derivative contracts with the banks, for to Group and Company, of N4.2 billion and N2.8 billion respectively (2019: N1.7 billion and N1.4 billion). Included in sundry debtors is an amount of N4.0 billion (2019: N5.7 billion) relating to Company's dividend receivable from subsidiaries

Exposure to credit risk

The average credit period on sale of goods is 30 days. The Group uses an allowance matrix to measure the Expected Credit Losses (ECLs) of trade receivables from customers. Loss rates are calculated using a 'roll rate' method based on the probability of a receivable progressing through successive stages of delinquency to write-off. Roll rates are calculated separately for exposures in different segments based on the following common credit risk characteristics - geographic region, age of customer relationship and type of product purchased and industry sector.

The historical loss rates are adjusted to reflect current and forward looking information on macroeconomic factors affecting the ability of the customers to settle the receivables. The Group has identified the GDP and the inflation rate of the countries in which it sells its goods and services to be the most relevant factors, and accordingly adjusts the historical loss rates based on expected changes in these factors. Scaler factor of 1.01 applied are based on GDP inflation forecast and industry outlook.

The Group has recognised an allowance for doubtful debts of 100% against all receivables over 365 days because historical experience has been that receivables that are past due beyond 365 days are not recoverable. Allowances for doubtful debts are recognised against trade receivables between 30 and 365 days.

Before accepting a new customer the Group initially trades with the customer on a cash basis to assess the customer's ability and also determine the customer's transaction volumes. This enables a reasonable credit limit to be set. Once these are determined the customer is then allowed to apply for a credit facility from the Company through a rigorous process with several levels of approval. Also certain categories of credit customers provide bank guarantees before being accepted as credit customers of the Group.

Credit sales form a small portion of overall sales. The concentration of credit risk is limited due to this fact and the large and unrelated customer base. The Group has pledged no trade receivables during the year.

Flour Mills of Nigeria Plc

Annual Report for the year ended 31 March 2020

Notes to the Annual Report for the year ended 31 March 2020

27. Trade and other receivables (continued)

The Group disaggregated its receivables based on customers' risk profiles. The provision for credit losses is therefore based on past due status without disaggregating into further risk profiles.

Expected credit loss assessment for individual customers

The Group uses an allowance matrix to measure the ECLs of trade receivables of customers which are considered by the directors as highly impacted by the COVID-19 pandemic. The roll rates are calculated through successive stages of delinquency to write off. The Directors considered the impact of COVID-19 during the year in the determination of the loss rates applied to be receivable in this category:

Group		31-Mar-20	31-Mar-20	31-Mar-19	31-Mar-19

Balance	2,679,955	6,373,523	9,053,478	244,360	9,297,838

The Changes in the loss allowances for the Group and Company is attributable to increase in amount due from inter company loans and third party trade receivables. Additionally, the Company and the Group adjusted the expected credit loss model for the impact of the COVID 19 pandemic on certain segment of its customers base that were assessed as significantly impacted due to the COVID 19 pandemic. See Note 45 for additional information on exposure of long term loan and trade receivables to credit risk.

Notes to the Annual Report for the year ended 31 March 2020

28. Derivatives (continued)

The Group and Company's derivative asset and liability represents the fair value change on Non-Deliverable Forward (NDF) contracts with the intention of hedging against exchange rate volatility of foreign payables from various vendors. At the end of the year, the Group and Company had a total payable of USD116 million.

The full fair value of a derivative is classified as a non-current asset or liability if the remaining maturity of the derivative is more than 12 months and, as a current asset or liability, if the maturity of derivative is less than 12 months.

The fair value of the futures and forward contracts have been determined using market-related input as follows:

*Exchange rate of N386/ USD (NAFEX year end rate)

*Average discount rate of 12.56% determined based on the NIBOR and LIBOR rates.

*The value of the forward is the discounted value of the cash flow to be obtained using the difference between the strike price and the estimated foreign exchange rate at maturity date.

29. Prepayments

Details of Borrowings

(a) Flour Mills of Nigeria Plc obtained funds from the CBN/BOI Power and Aviation Intervention Fund and Manufacturing Intervention Fund in different tranches, with tenors of 10 to 15 years. Principal repayment commenced in September 2011. Principal and interest are repaid quarterly in arrears. The facilities have fixed interest rates between 7% and 9% per annum. The loans were granted to finance or refinance the construction of the Group's power plants and expansion of existing manufacturing plants.

In addition, various subsidiaries within the Group have obtained Long-Term and Working Capital loans directly from the Bank of Industry at rates between 10% and 12%. Tenors range between 3 and 7 years.

(b) FMN's subsidiaries have a total of N5.0 billion (2019: N5.6 billion) outstanding in Central Bank of Nigeria Commercial Agricultural Credit Scheme. Loans were obtained by some subsidiaries at Interest rate ranging from 7%-9% per annum. Medium-term loans under the scheme have a moratorium between 18 months and 24 months and tenors of 5-7 years (with principal and interest payable quarterly in arrears), while short-term loans under the scheme have a tenor of one year.

(c) The Central Bank of Nigeria, as part of the efforts to unlock the potential of the real sector to engender output growth, value added productivity and job creation established the Real Sector Support Facility (RSSF) and the Differentiated Cash Reserve Ratio Programme. Various subsidiaries have obtained funds under this facility at 9%, with quarterly repayment of principal and interest for medium-term loans. Short-term loans under the scheme have a tenor of one year, with principal repayment at the end of the period.

(d) This loan relates to the borrowings provided by other subsidiaries in the Flour Mills Group to Flour Mills of Nigeria Plc. These are Shao and Crestview. The relevant interest rate is the prevailing interest rate on short term loans provided by commercial banks. During the year, this ranged from 9%-15% (2019: 13%-23%).

(e) Other bank loans (amounting to N5.8 billion for the Group), refers to debt obtained by FMN subsidiaries from commercial banks in Nigeria, with tenors ranging from 60 days to 3 years. These are repayable at various dates between 2020 and 2023 with interest rates varying between 10.5% and 11%.

(f) On November 1, 2018, Flour Mills of Nigeria Plc completed a corporate bond issue, having raised a total amount of N20.11 billion from investors. The issue was in two Series- N10 billion of Series 1 at 15.5% with a tenor of 3 years (bullet repayment of principal at the end of the tenor) and Series 2 of N10.11 billion at 16% with a tenor of 5 years (semi-annual repayments of principal after a 1-year moratorium)-

Also, on February 21, 2020, Flour Mills of Nigeria Plc completed another corporate bond issue, having raised a total amount of N20.00 billion from investors. The issue was in two Series- N12.5 billion of Series 3A at 10.0% with a tenor of 3 years (bullet repayment of principal at the end of the tenor) and Series 3B of N7.5 billion at 11.1% with a tenor of 5 years (bullet repayment of principal at the end of the tenor).

Flour Mills of Nigeria Plc

Annual Report for the year ended 31 March 2020

Notes to the Annual Report for the year ended 31 March 2020

33. Borrowings (continued)

(g) In a bid to catalyze financing of the real sector of the Nigeria economy, the Central Bank of Nigeria has set aside N300 billion to fast-track the development of electric power projects and provide leverage for additional private sector investment in the power and aviation sectors. The Group obtained the loan to acquire and construct a combined heat and power system with two 15MW gas turbines each connected to its own waste heat system generator. The funds from this facility was obtained at 9%, with quarterly repayment of principal and interest.

Loans obtained under (a - d) were obtained at below market interest rate and were hence recorded at their fair value at inception, using the appropriate market rate at date of draw down. Due to the nature of the lending and the providers, the benefit of the below market rate has been treated as government grants and included in deferred income (Note 36).

34. Retirement benefits

Defined benefit plan

The Group operates unfunded defined benefit plans for qualifying employees of the Group. Under the plans, the employees are entitled to retirement benefits on attainment of a retirement age ranging from 50 to 60 years.

The most recent actuarial valuations of the present value of the defined benefit obligation were carried out at 31 March 2020 by EY Nigeria (FRC registration number: FRC/2012/0000000738). The present value of the defined benefit obligation, and the related current service cost, were measured using the Projected Unit Credit Method.

Average duration of the plan (years)	11.80	11.20	10.70	10.70

Demographic assumption

Mortality in service and Withdrawal from service

The rates of mortality assumed for employees are the rates published in the A67/70 Ultimate Tables, published jointly by the Institute and Faculty of Actuaries in the UK due to unavailability of published reliable demographic data in Nigeria.

Sample age	Number of deaths in year out of 10,000 lives	Withdrawal from Service (Age band)	Withdrawal from Service (Rate)
25	7	<=30	2.5%
30	7	31 - 39	1.5%
35	9	40 -44	1.0%
40	14	45 - 59	0.0%
45	26		

Sensitivity analysis

Reasonably possible changes at the reporting date to one of the relevant actuarial assumptions, holding other assumptions constant, would have affected the defined benefits obligation by the amount shown below:

Flour Mills of Nigeria Plc

Annual Report for the year ended 31 March 2020

Notes to the Annual Report for the year ended 31 March 2020

35. Long service award

Long term service award is granted at first to employees that have spent a minimum of ten years in service and for every multiple five years the employee remains in service. Payments to employees are both in cash and in kind.

The most recent actuarial valuations of the present value of the defined benefit obligation were carried out at 31 March 2020 by EY Nigeria (FRC registration number: FRC/2012/00000000738). The present value of the defined benefit obligation, and the related current service cost, were measured using the Projected Unit Credit Method.

Carrying value

The amount included in the statement of financial position arising from the Group's obligations in respect of its long service awards is as follows:

	Group		Company	
	31-Mar-20 N. '000	31-Mar-19 N. '000	31-Mar-20 N. '000	31-Mar-19 N. '000
Long service awards	2,738,787	2,183,131	2,277,821	1,881,868

The movement in the account during the year was as follows:

At the beginning of the year	2,183,131	1,948,287	1,881,868	1,720,629
Net transfer	-	-	(72,480)	(7,092)
Net expense recognised in profit or loss	695,983	526,318	510,019	416,200
Benefits paid	(140,327)	(291,474)	(41,586)	(247,869)
At the end of the year	2,738,787	2,183,131	2,277,821	1,881,868

Net expense recognised in profit or loss

Service cost	353,156	295,972	243,120	210,559
Interest cost	308,782	251,009	265,180	222,174
Actuarial losses/(gains)	34,045	(20,663)	1,719	(16,533)
	695,983	526,318	510,019	416,200

The actuarial gains and losses on long service awards are analyzed as follows:

Change in economic assumption	167,960	(79,855)	145,223	(70,031)
Change in demographic assumption	(133,915)	59,192	(143,504)	53,498
At 31 March	34,045	(20,663)	1,719	(16,533)

The principal assumptions used for the purpose of the actuarial valuations were as follows:

Group

	Valuation at	
	31-Mar-20	31-Mar-19
Discount rate (per annum)	13.5%	14.55%
Expected rate(s) of salary increases (per annum)	12%	12%

Current liabilities	2,654,089	-	1,298,974	-
	13,356,822	-	1,640,586	-

The incremental borrowing rates of the naira and dollar denominated lease liabilities are 16% and 7.73% respectively.

Variable Lease

The Group and Company's motor vehicle lease arrangements are based on variable payment terms linked to the usage of the trucks. Variable payment terms are used for a number of reasons including; minimising fixed cost, and optimising operational flexibility. The overall financial effect of using variable payment terms is that increased usage of the vehicle would increase total lease payments made under the motor vehicle lease arrangement.

Total expense incurred by the Group in relation to variable leases (motor vehicle lease contract) was N 598.04 million

The total expenses incurred by the Group and Company in relation to short term leases which were not included in the measurement of lease liability amounts to N622.13 million and N108.64 million respectively

Group as lessor

The Group leases out its investment property. All leases are classified as operating from a lessor perspective. The Group recognised lease payments (rental income) received from third party lessee as income on a straight-line basis over the lease term. The total amount of rental income received in the year is N190.79 million (2019: N244.35 million).

Lease payments are received in-advance from third party lessees

45. Financial instruments and risk management

Capital risk management

The Group and Company manage their capital to ensure that it is able to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders and to maintain an efficient capital structure to optimise the cost of capital.

In order to maintain the capital structure, the Group may adjust the amount of dividends paid to shareholders, issue new shares by way of right-issue or sell investments to reduce debt. The Group monitors capital on the basis of the debt to equity ratio. This ratio is calculated as net debt divided by total equity. Net debt is calculated as total borrowings (including overdrafts, bonds and other bank loans as shown in the consolidated statement of financial position) less cash and cash equivalents. Total equity is the equity attributable to owners of Flour Mills of Nigeria Plc. in the consolidated statement of financial position.

The Group and Company are not subject to any externally imposed capital requirements.

Group operates a centralised procurement department in order to take advantage of the benefits of bulk purchase and also the logistics and transportation of products are handled by the Transport division and this creates more efficiency in delivery and thereby reducing cost.

The Group's risk management committee reviews the capital structure of the Group on a semi-annual basis. As part of this review, the committee considers the cost of capital and the risks associated with each class of capital.

Ratios

The debt : equity ratio of the Group as at the reporting date was as follows:

		Group		Company

Financial risk management

Overview

The Group is exposed to the following risks from its use of financial instruments:

- Credit risk;
- Liquidity risk; and
- Market risk (currency risk, interest rate risk and price risk).

Risk management is carried out by management under policies approved by the board of directors. Management identifies and evaluates the financial risks in co-operation with the Group's operating units. The board provides written principles for overall risk management, as well as written policies covering specific areas, such as foreign exchange risk, interest rate risk credit risk and liquidity risk. The Group's overall risk management program seeks to minimize potential adverse effects on the Company's financial performance.

Flour Mills of Nigeria Plc

Annual Report for the year ended 31 March 2020

Notes to the Annual Report for the year ended 31 March 2020

45. Financial instruments and risk management (continued)

Financial risk management is an integral part of the way the Group is managed. The Board of Directors establishes the Group's financial policies and the Group Managing Director establishes objectives in line with these policies. The Chief Financial Officer is then responsible for setting financial strategies, which are executed by the Centralised Treasury department.

The risk management activities are supervised by the Internal Audit Department and they provide an independent assurance of the risk framework. The Internal Audit assesses compliance with established controls and recommendations for improvement in processes are escalated to relevant management, Audit Committee and Board of Directors.

45.1 Credit risk

Credit risk is the risk of financial loss to the Group if a customer or counterparty to a financial instrument fails to meet its contractual obligations resulting in financial loss to the Group. The Group has adopted a policy of only dealing with creditworthy counterparties and credit limits are set, where appropriate, as a means of mitigating the risk of financial loss from defaults. The Group uses publicly available financial information and its own trading records to rate its major customers. Credit exposure is controlled by counterparty limits that are reviewed and approved by the risk management committee annually.

Trade and other receivables consist of a large number of customers, spread across diverse industries and geographical areas. It also includes receivables from related parties. Ongoing credit evaluation is performed on the financial condition of customers in respect of trade receivable and, where appropriate, bank credit guarantee is obtained.

The Group has disaggregated its trade receivables to respective segments based on its assessment of Group of entities that are highly exposed to the impact of COVID-19 pandemic and increase risk of credit loss. The Group defines counterparties as having similar characteristics if they are related entities.

Expected credit loss assessment for private sector customers

The Group allocates each exposure to a credit risk grade based on data that is determined to be predictive of the risk loss (including but not limited to external ratings, audited financial statements, management accounts and cash flow projections and available press information about customers) and applying experienced credit judgement. Credit risk grades are defined using qualitative and quantitative factors that are indicative of the risk of default and are aligned to external credit rating definitions from agencies.

Exposures within each credit risk grade are segmented by geographic region and industry classification and an ECL rate is calculated for each segment based on delinquency status and actual credit loss experience over the past seven years. These rates are adjusted for where necessary to reflect the differences between the economic conditions during the period over which the historical data has been collected, current conditions and the Group's view of economic conditions over the expected lives of the receivables.

Intercompany loan receivables

The Company held non-trade receivables from its subsidiaries. The Company uses a general impairment model approach for assessment of ECLs for these receivables. Based on an assessment of qualitative and quantitative factors that are indicative of the risk of default (including but not limited to external ratings, latest financial statements, management accounts and cash flow projections, and applying experienced credit judgement). Impairment on these balances has been measured on the lifetime expected credit loss basis. The loss allowance recognised during the period are lifetime expected credit loss. Management uses credit risk grading of below investment grade.

Cash and cash equivalents

The cash and cash equivalents are held with banks and financial institution counterparties, which are rated by established rating agencies.

Impairment on cash and cash equivalents has been measured on the 12-month expected loss basis and reflects the short maturities of the exposures. The Group considers that its cash and cash equivalents have low credit risk based on the external credit ratings of the counterparties.

Trade and other receivables consist of a large number of customers, spread across diverse industries and geographical areas. It also includes receivables from related parties. Ongoing credit evaluation is performed on the financial condition of customers in respect of trade receivable and, where appropriate, bank credit guarantee is obtained.

Flour Mills of Nigeria Plc

Annual Report for the year ended 31 March 2020

Notes to the Annual Report for the year ended 31 March 2020

45. Financial instruments and risk management (continued)

Sundry debtors consists majorly of dividends receivable, withholding tax credit receivable and other non-trade deposit paid. The Group continuously assesses the recoverability of these receivables. When the assessment reveals an indication of crystallization of a credit risk, the company recognizes an impairment loss provision to the extent it deems the amount irrecoverable.

Derivative contracts are entered into with bank and financial institution counterparties which have high quality credit ratings.

		47,622,402	59,837,035

Staff receivables are recovered through payroll deductions. Accordingly, management does not consider any credit risk on staff receivables.

The Group/ Company mitigates its credit risk exposure of its bank balances and derivative financial asset by selecting and transacting with reputable banks with good credit ratings and a history of strong financial performance.

45.2 Liquidity risk

Liquidity risk is the risk that the Group will encounter difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial asset.

Ultimate responsibility for liquidity risk management rests with the board of directors, which has established an appropriate liquidity risk management framework for the management of the Group's short-, medium- and long-term funding and liquidity management requirements. The Group and Company manage liquidity risk by maintaining adequate reserves, banking facilities and reserve borrowing facilities, by continuously monitoring forecast and actual cashflows, and by matching the maturity profiles of financial assets and liabilities.

Maturity analysis of financial liabilities

The Group has access to undrawn borrowing facilities amounting to N88 billion. The Bank overdraft maybe drawn at any time and may be terminated by the bank without notice. The Group continues to monitor its access to finance and take appropriate measures to ensure obligations are settled in the normal course of business.

45.3 Market risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices such as interest rate, exchange rates and other prices.

The Group's activities expose it primarily to financial risks of changes in foreign currency exchange rates, interest rates, equity prices and commodity prices. Market risks exposures are measured using sensitivity analysis. There has been no change to the manner in which these risks are managed and measured.

45.3.1 Foreign currency risk

The Group is mainly exposed to fluctuation in the exchange rate of the American Dollar (USD).

The Group is currently involved in the backward integration of Agro Allied products in order to reduce the foreign exchange risk associated with the high dependence on imported raw materials. The Group has also commenced the export of products to neighbouring African Countries in order to get more inflow of the USD.

Effective closing rate as at 31 March 2020 is N387/ US Dollar (2019: 361/ US Dollar).

45. Financial instruments and risk management (continued)

Foreign currency exposure at the end of the reporting period

The net carrying amounts, in Naira, of the various exposures, are denominated in the following currencies. The amounts have been presented in Naira by converting the foreign currency amounts at the closing rate at the reporting date:

	Group		Company	
	31-Mar-20 USD'000	31-Mar-19 USD'000	31-Mar-20 USD'000	31-Mar-19 USD'000
Cash and bank balance	5,690	2,773	4,724	1,936
Trade receivables	922	4,922	839	4,921
Trade payables	(107,145)	(162,976)	(102,172)	(120,911)
Borrowings	-	(20,000)	-	(20,000)
Net US Dollar exposure	(100,533)	(175,281)	(96,609)	(134,054)

Foreign currency sensitivity analysis

The following information presents the sensitivity of the Group to an increase or decrease in the respective currencies it is exposed to. The sensitivity rate is the rate used when reporting foreign currency risk internally to key management personnel and represents management's assessment of the reasonably possible change in foreign exchange rates. The sensitivity analysis includes only outstanding foreign currency denominated amounts and adjusts their translation at the reporting date. No changes were made to the methods and assumptions used in the preparation of the sensitivity analysis compared to the previous reporting period.

The following table details the Group and Company's sensitivity to a 10%, increase and decrease in the value of Naira against USD. Management believes that a 10% movement in either direction is reasonably possible at the balance sheet date. The sensitivity analysis below include outstanding balances of USD denominated assets and liabilities. A positive number indicates an increase in profit where Naira strengthens by 10% against the USD. For a 10% weakening of Naira against the USD there would be an equal and opposite impact on profit, and the balances below would be negative.

Group	31-Mar-20	31-Mar-20	31-Mar-19	31-Mar-19
Increase or decrease in rate	Increase	Decrease	Increase	Decrease
Impact on profit or loss:				
US Dollar 10% (2019: 10%)	3,890,627	(3,890,627)	6,286,966	(6,286,966)
Company	31-Mar-20	31-Mar-20	31-Mar-19	31-Mar-19
Increase or decrease in rate	Increase	Decrease	Increase	Decrease
Impact on profit or loss:				
US Dollar 10% (2019: 10 %)	3,738,768	(3,738,768)	4,808,244	(4,808,244)

Flour Mills of Nigeria Plc

Annual Report for the year ended 31 March 2020

Notes to the Annual Report for the year ended 31 March 2020

45. Financial instruments and risk management (continued)

45.3.2 Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate due to the changes in market interest rates. The Group maintains a centralised treasury department and Group borrowing is done in order to obtain lower interest rates. The Group negotiates long term credit facilities and obtains subsidised loans from the Government in order to reduce the risk associated with high cost of borrowing. The Group also takes advantage of the Central Bank of Nigeria intervention funds and grants from the Federal Government at below market rate in order to mitigate this risk.

The Group is exposed to interest rate risk because it borrows funds at both fixed and floating interest rates. The sensitivity analysis below have been determined based on the exposure to interest rates for borrowings at the end of the reporting period. For floating rate liabilities, the analysis is prepared assuming the amount of the liability outstanding at the end of the reporting period was outstanding for the whole year. 1000 basis points (BP) increase or decrease are used when reporting LIBOR risk internally to key management personnel and these represent management's assessment of the reasonably possible change in interest rates.

Interest rate profile and tenor of borrowings

The interest rate profile of interest bearing financial instruments at the end of the reporting period was as follows:

Group	Currency N. '000	Nominal interest rate	Maturity N. '000	31-Mar-20 N. '000	31-Mar-19 N. '000
Bank overdraft	Naira	14%-22%	On demand	5,542,528	9,651,139
Bank of industry Loan- CBN intervention fund	Naira	7%-12%	2018-2025	23,175,203	23,699,914
Commercial Agricultural Credit Scheme- Agricultural loans	Naira	7%-9%	2018-2022	5,046,152	5,598,441
Power and Airline Intervention fund	Naira	7%	2022	1,993,681	1,422,488
Commercial papers and bonds	Naira	14%-16%	2023	47,853,825	41,506,648
Term loan	Naira	22%-24%	2018-2020	33,599,652	33,599,652
RSSF-Real Sector Support Facility	Naira	7%-9%	2018-2027	20,199,275	19,165,374
				137,410,316	134,643,656

Company	Currency N. '000	Nominal interest rate	Maturity N. '000	31-Mar-20 N. '000	31-Mar-19 N. '000
Bank overdraft	Naira	14%-22%	On demand	1,553,349	1,519,149
Bank of industry Loan- CBN intervention fund	Naira	5%-10%	2018-2026	1,321,835	1,989,114
Terms loans	Naira	17%-25%	2019	-	29,890,491
Commercial papers and bonds	Naira	14%-16%	2023	47,853,825	41,506,648
RSSF-Real Sector Support Facility	Naira	7%-9%	2018-2027	6,748,650	-
Power and Airline Intervention fund	Naira	7%	2022	996,352	-
Intercompany loan	Naira	13-23%	On demand	96,376	3,834,259
				58,570,387	78,739,661

Interest rate sensitivity analysis

The following sensitivity analysis has been prepared using a sensitivity rate which is used when reporting interest rate risk internally to key management personnel and represents management's assessment of the reasonably possible change in interest rates. All other variables remain constant. The sensitivity analysis includes only financial instruments exposed to interest rate risk which were recognised at the reporting date. No changes were made to the methods and assumptions used in the preparation of the sensitivity analysis compared to the previous reporting period.

If LIBOR had been 1000 basis points (i.e. 10%) higher/lower and all other variables were held constant, the Group's profit or loss will be affected as follows:

Flour Mills of Nigeria Plc

Annual Report for the year ended 31 March 2020

Notes to the Annual Report for the year ended 31 March 2020

45. Financial instruments and risk management (continued)

45.3.3 Price risk

The Group is further exposed to commodity price risk. The risk arises from the Group's need to buy specific quantities and qualities of raw materials to meet its milling requirements. These raw materials include wheat and cassava flour. The risk is partly mitigated by buying these raw materials 3 months in advance of use. This is based on management past experience with price movements.

Equity price risk

The Group is exposed to equity price risk which arises from its fair-value-through-other-comprehensive-income equity instruments. The management of the Group monitors the proportion of equity securities based on market indices. The primary goal of the Group's investment strategy is to maximize its returns in general. The maximum exposure to equity price risk at the reporting date is N22.4 million (2019: N41.1 million).

The Group investment carried at FVOCI, is listed on the Nigerian Stock Exchange. A 10% change in the share price would have increased equity by N2.24 million, an equal change in the opposite direction would have decreased equity by N2.24 million.

Flour Mills of Nigeria Plc

Annual Report for the year ended 31 March 2020

Notes to the Annual Report for the year ended 31 March 2020

46. Fair value information (continued)

Fair value hierarchy

Financial instruments in Level 1

The fair value of financial instruments traded in active markets (quoted equity) is based on quoted market prices at the reporting date. A market is regarded as active if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service, or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis

The quoted market price used for quoted equity investment held by the Company is the bid price at the reporting date. These instruments are included in level 1. There were no transfers between levels during the year

Financial instruments in Level 2

The fair value of financial instruments that are not traded in an active market (loans and borrowings) is determined by using discounted cash flow valuation techniques. This valuation technique maximize the use of observable market data by using the market related interest rate for discounting the contractual cash flows. There are no significant unobservable inputs. There were no transfers between levels during the year. The basis of measurement has remained the same between current and prior years.

The fair value of future and forward exchange contracts is determined using quoted forward exchange rates at the reporting date and present value calculations based on high credit quality yield curves in the respective currencies.

Financial instrument in Level 3

The valuation model is based on market multiples derived from quoted prices of companies comparable to the investee and the expected revenue and EBITDA of the investee. The estimate is adjusted for the effect of non-marketability of the equity securities.

Financial instruments not measured at fair value

The valuation model considers the present value of expected payment, discounted using a risk-adjusted discount rate.

47. Non-audit fees paid to the Auditors

In the current year the total amount of non-audit fees paid to our auditors amounted to N40.3 million (2019: N134.1 million). This is in respect of Tax and IT project advisory services rendered during the year.

48. Substantial interest in shares

Excelsior Shipping Company Limited has 2,581,286,589 (2019: 2,256,437,696) ordinary shares of 50k each, representing 62.95% (2019: 55.03%) of the issued and paid-up share capital of the Company.

49. Commitments

Guarantees and other financial commitments

The Company has committed itself to providing continued financial support to all subsidiaries in the Group with net liability position. The Company also had no commitments arising from unconfirmed letters of credit amounting (2019: Nil).

The Directors are of the opinion that all known liabilities and commitments which are relevant in assessing the Company's state of affairs have been taken into consideration in the preparation of the financial statements under review.

Gas agreement

The long term gas purchase agreement signed by the Company for the supply of natural gas to Apapa Factory in April 2005 for twenty years came into effect during the last quarter of 2006. This commits the Company to taking up a specified minimum quantity of gas over the duration of the purchase agreement.

Flour Mills of Nigeria Plc

Annual Report for the year ended 31 March 2020

Notes to the Annual Report for the year ended 31 March 2020

50. Contingencies

The Group and the Company are involved in litigation suits in the ordinary course of business. In addition, the Group and Company undergo periodic tax regulatory reviews in the normal course of business. The total amount claimed in cases and contingencies from these tax regulatory reviews against the Group and Company are estimated at N16.5 billion and N2.86 billion respectively (31 March 2019: N13.47 billion and N1.73 billion). The actions are being contested and the Directors are of the opinion that none of the aforementioned cases or tax regulatory reviews are likely to have a material adverse effect on the Group and Company.

In addition, the Group enjoyed pioneer status tax incentive from 1 July 2013 – 30 June 2017 in line with the provisions of Industrial Development (Income Tax Relief) Act (IDITRA). During this period, the accumulated distributable pioneer profits of N13.6 billion was reported in the tax returns filed with Federal Inland Revenue Service (FIRS). In line with the provisions of the IDITRA, the accumulated pioneer profit is expected to be certified by FIRS, for it to be treated as tax exempt upon distribution. While the Group awaits FIRS certification, a cumulative tax exempt dividend of N13.4 billion comprising N10.7 billion for 2019 and N2.7 billion for 2020 respectively has been declared.

As it is the practice of FIRS to conduct pioneer profit and asset certification exercises on companies that are enjoying (or enjoyed) pioneer status, the Directors are of the view that this review will be conducted at some time in the future. In the unlikely event that such review results in the FIRS certifying the cumulative pioneer profits to be an amount lower than N13.4 billion, the Group may be exposed to additional tax of 40% (i.e. companies income tax at 30% and withholding tax at 10%) of the amount in dispute. The Directors are of the opinion that it is unlikely that there will be any adverse material effect upon review of the pioneer profit position by the FIRS during the certification exercise.

51. Events after the reporting period

On 11 March 2020, the World Health Organization declared the Coronavirus (COVID-19) outbreak to be a pandemic in recognition of its rapid spread across the globe, with over 150 countries now affected. Many governments are taking increasingly stringent steps to help contain or delay the spread of the virus.

Additionally, there is a significant increase in economic uncertainty which is, for example, evidenced by volatility of oil prices and currency exchange rates.

Due to the uncertainty of the outcome of the current events, the Company cannot reasonably estimate the impact these events will have on the Company's financial position, results of operations or cash flows in the future.

Except as disclosed above, there are no other significant events after the reporting period which could have a material effect on the financial position of the Company as at 31 March 2020, and its financial performance for the year then ended, that have not been adequately provided for or disclosed in these financial statements

Flour Mills of Nigeria Plc

Annual Report for the year ended 31 March 2020

Notes to the Annual Report for the year ended 31 March 2020

52. Discontinued operations

The Company discontinued its fertilizer processing business to a new entity within the Group as part of the restructuring of the Group in prior year, the decision was made by the Company to register the Fertilizer as a separate company within the Group.

The assets and liabilities of the Fertilizer division have been transferred to Golden Fertilizer Company Limited at their carrying amount. The assets and liabilities transferred and the results of the discontinued operation for the year are as set out below;
